

**RESEARCH ADVISORY COMMITTEE AND SUB-COMMITTEES BAHRIA UNIVERSITY COLLEGE OF MEDICINE ISLAMABAD**

## **BAHRIA UNIVERSITY ORIC**

Research & Development activities are an integral part of academic life at Bahria University. The Research Directorate at the BUHO is the main body entrusted with coordinating and facilitating all R&D activities. On yearly basis, the directorate allocates a dedicated research fund for each department in the University. The Directorate also provides guidelines as well as financial and infrastructure support to establish research group of labs. Faculty members joining the University are encouraged to either establish their own research group or become part of an existing group in their areas of expertise. Students undertaking research projects both at the undergraduate level are also provided with research funding after approval from the Research Directorate while the faculty members supervising the undergraduate projects and Master's thesis are offered remuneration as well.

Bahria University encourages its faculty as well as students to participate in and present their research findings at the national International research forums of repute by providing attractive incentives. The University offers financial sponsorship for presentation of research papers in approved local conferences. In case of International conferences, the University not only facilitates the submission of funding applications to HEC but also provides partial financing for the conference. Similarly, the University also arranges for the publication fee (if any) for all research papers accepted in HEC recognized/ISI indexed journals. For each research paper accepted in an HEC recognized/ISI/ indexed journal, BU awards the respective faculty member with a respectable honorarium. It is worth mentioning, that these monetary incentives for publishing in conferences and journals of repute are unconstrained and these opportunities can be availed without any limit on the number of awards.
