

BAHRIA UNIVERSITY Health Sciences Medical College

(BUHS Medical College)

Karachi, Pakistan

Overview

In 2008, the Pakistan Navy founded Bahria University Health Sciences Campus, a Higher Education Commission and Pakistan Medical & Dental Council affiliate. Medical and Dental College, Physical Therapy College, Nursing College, and College of Allied Health Sciences share this wing's library, video conferencing, and advanced multidisciplinary research lab. BUHS provides BS-MLT and BS-Biotechnology. Clinical education is in PNS SHIFA, a tertiary care facility for Armed Forces lab patients. Students can learn from the hospital's many clinical scenarios. Effectively managed outpatient departments across specialties offer speedy consultations, on-site lab tests, X-rays, and imaging. Biotechnologists and doctors collaborate to deliver the finest care. One-on-one weekly lessons offer Bahria University an edge. These workshops last 1 hour with subject experts and undergraduates. At Bahria University, international students enrich academic fields. Medical technologists are crucial because laboratory test results influence 70% of medical decisions. National professional bodies can certify graduate medical technicians. This undergraduate program trains medical insights-technology users to save lives. BUHSC's strong MBBS, BDS, DPT, and MLT curricula now include BS-Biotechnology. This program aims to modernize biotechnologist education. The program diagnoses, treats, and evaluates patients using biotechnology for human, animal, and environmental health.

Key Services

National and International Workshop and Conferences

We take pride in our commitment to knowledge dissemination and intellectual growth. We organize several National and International Workshops and Conferences as part of this endeavor. These events serve as platforms for scholars, researchers, experts, and students from all over Pakistan and across the globe to come together and exchange ideas, share insights, and discuss the latest developments in the medical field.

American Association for Clinical Chemistry (AACC)

AACC is a unique learning platform where students have been offered various courses and mentoring services. Online certificate programs enable you to earn continuing education credits and access to timely laboratory medicine best practices by experts. Access your learning at your own pace by navigating through interactive online modules while on the go.

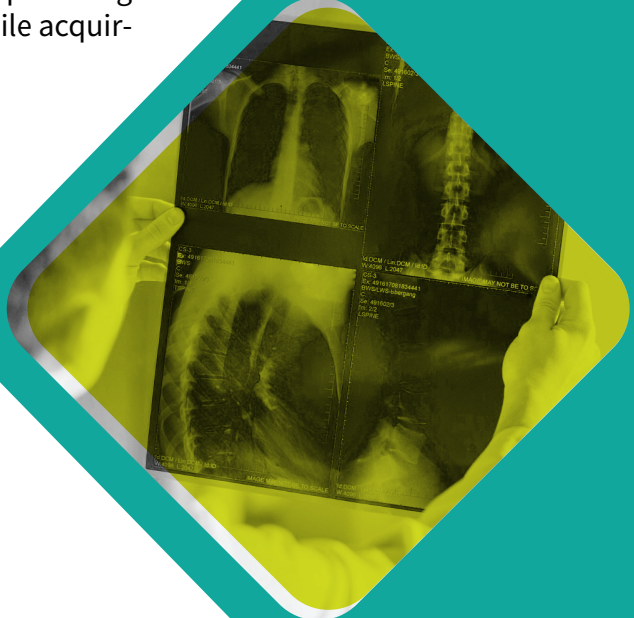

Research And Innovation

Research at BU is focused and aligned with the national and international applied research requirements and standards. The innovation development aspect in research is germinated in institutions of higher learning, which can ultimately guide the industry when we observe strong tendencies of globalization of R&D. MDRL provides research facilities and resources to undergraduate and postgraduate students in various molecular and health-related projects. All researchers are invited to collaborate and utilize the instrumental facility at MDRL Lab. This lab is already registered and available at HEC “Access to Scientific Instrumentation,” all postgraduate students can benefit from molecular, histopathological, and analytical instruments available in MDRL.

Industry - Academia Linkages

Bahria University's partnerships division offers comprehensive support to higher education institutions. These partnerships reflect our commitment to providing quality-focused and leading education services. Bahria University is a truly inclusive university that knows no academic borders. Our extensive network of partner institutions allows students to foster a global perspective and amplify their learning journey, empowering students to explore diverse cultures and academic disciplines while acquiring credit toward their degree.

Medical Lab Technologists Association of Pakistan (MLTAP)

The first professional organization in Pakistan, the Medical Laboratory Technologists Association of Pakistan (MLTAP), represents devoted laboratory specialists. MLTAP helps Clinical Laboratory Scientists improve professionally in diagnostic and research/scholarly endeavors.

Bahria University's MLT department and MLTAP will collaborate on research and development, publication, collaborative programs, and more. In 2022, 19th Health Asia held a large plate-form joint seminar for MLT students, scientists, and medical professionals across Pakistan to maximize reciprocity and save costs.

Rahila Research and Reference Lab Private Limited

The first professional organization in Pakistan, the Medical Laboratory Technologists Association of Pakistan (MLTAP), represents devoted laboratory specialists. MLTAP helps Clinical Laboratory Scientists improve professionally in diagnostic and research/scholarly endeavors.

Bahria University's MLT department and MLTAP will collaborate on research and development, publication, collaborative programs, and more. In 2022, 19th Health Asia held a large plate-form joint seminar for MLT students, scientists, and medical professionals across Pakistan to maximize reciprocity and save costs.

Dr. Essa Laboratory And Diagnostic Centre

The first professional organization in Pakistan, the Medical Laboratory Technologists Association of Pakistan (MLTAP), represents devoted laboratory specialists. MLTAP helps Clinical Laboratory Scientists improve professionally in diagnostic and research/scholarly endeavors.

Bahria University's MLT department and MLTAP will collaborate on research and development, publication, collaborative programs, and more. In 2022, 19th Health Asia held a large plate-form joint seminar for MLT students, scientists, and medical professionals across Pakistan to maximize reciprocity and save costs.

Dr. A. Q. Khan Institute of Biotechnology and Genetic Engineering

The well-established Dr. A. Q. Khan Institute of Biotechnology and Genetic Engineering (KIBGE) at the University of Karachi offers higher education. The institute investigates biotechnology and genetic engineering applications in advanced scientific fields to improve human health and the environment.

After starting research calibration with KIBGE in December 2021, BUHSCK's MLT Department has worked on biomarkers for oral squamous cell cancer

Corporate Adviory Council (CAC)

The formation of the Corporate Advisory COUNCIL (CAC) at Bahria University College of Allied Health Sciences (BUCAHS) can play a pivotal role in providing strategic guidance and valuable insights concerning the current professional and industrial trends to the executive leadership team, contributing to the growth and success of our college and programs to produce outstanding graduates.

Avenues of Collaboration

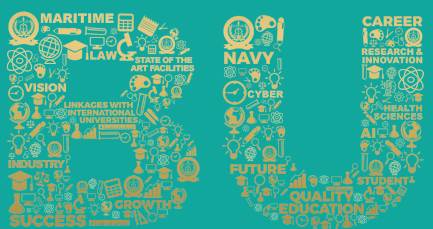

- Capacity Building/ Trainings
- Corporate Advisory Committee (CAC)
- Guest Speakers
- Skilled HR (Employment+Internship)
- Consultancies
- Case Studies
