

13- Please add the amount of energy generated in campus through renewable sources, in kWh, for the last reporting year. This would include energy consumed, stored or sold on.

Bahria University has installed solar panels across all its campuses to promote the use of renewable energy and reduce its carbon footprint. In the last reporting year, the total amount of energy generated from these renewable sources amounted to **571,817 KWh**. This initiative reflects the University's commitment to sustainable energy practices and its broader environmental responsibility.

Solar Panels Power generation to be validated
