### **LETTER OF PROMULGATION**

1. It goes without saying "The more you sweat in peace; the less you bleed in war". So is the case with safety. More safety conscious we are safer we are. Safety at Bahria University requires but one thing, the concern. If we look around our place of work with the spectacle of safety, we find numerous unsafe acts. As safety-concerned people, we are duty-bound to correct them. Without stopping here, we need to visualize what all can go wrong and how can we pre-empt an accident. In this Health, Safety and Environment (HSE) Policy, an endeavor has been made not only to formalize safety efforts but to involve all onboard in the safety of the University. We aim to provide a safe and secure environment for our pupils, faculty, staff and visitors. This HSE Policy ensures that we have in place effective procedures to enable us to achieve this aim. Therefore, the safety procedures will operate within the framework described in this policy. This document provides how we seek to improve safety. The management, faculty, staff and students jointly can achieve high standards of safety at our campuses.

2. Another very important feature of this policy is the wellbeing of Persons with Disabilities (PWDs). PWDs deserves our support to play a positive role in the society. All out efforts are to be made for the safety and wellbeing of PWDs.

3. The policy is to be read carefully and implemented in letter and spirit in our areas of responsibility.

4. The contents of this policy are bound to change with time, experience and environment. Therefore, continuous input from all quarters is welcomed to improve safety.

**ASAD KARIM HI(M)**  
Rear Admiral (Retd)

## Table of Contents

### CHAPTER 1

- 1.1        **Safety Policy**
- 1.2        **Policy Statement**
- 1.3        **Policy Framework**
- 1.4        **Aim**
- 1.5        **Preamble**
- 1.6        **Applicability**
- 1.7        **Conflict in orders/duties**
- 1.8        **Understanding Safety**
- 1.9        **Occurrence**
- 1.10       **Reporting an Occurrence**
- 1.11       **Investigating an Occurrence**
- 1.12       **Risk Management Process**
- 1.13       **Steps of Risk Management**
- 1.14       **Buddy System**
- 1.15       **Safety Check-List**
- 1.16       **Reference Publications**
- 1.17       **Feedback**

### CHAPTER 2

- 2.1        **HSE Organisation**
- 2.2        **HSE Management Hierarchy**
- 2.3        **HSE Officer**

- 2.4            **Standing HSE Committee (SHC)**
- 2.5            **Fire Officer**
- 2.6            **Section In-charges and Onus of Responsibility**
- 2.7            **Risk Assessment**
- 2.8            **Reporting Channel**
- 2.9            **Scrutiny of Civil Works**
- 2.10           **RESPONSIBILITIES**
- 2.10.1        **Duties – Deputy Director HSE - BUHO**
- 2. 10.2        **Standing HSE Committee (SHEC)**
- 2. 10.3        **Campus Administration**
- 2. 10.4        **Faculty and Staff**
- 2. 10.5        **Section-In Charges**
- 2. 10.6        **Senior Medical Officer (SMO)**
- 2. 10.7        **Human Resources Managers**
- 2. 10.8        **Campus HSE Officers**
- 2. 10.9        **Deputy Director (Tech)**
- 2. 10.10       **Director/Deputy/Assistant Director (Admin & Coordination)**
- 2. 10.11       **Duties relevant to Staff and Students**
- 2.11           **HSE Audit**
- 2.12           **Promoting HSE at Campus**
- 2.13           **Work Permit and Conduct of Contractors**
- 2.14           **HSE Awareness through Community Support Programme**
- 2.15           **Promoting HSE at Campus**

2.16            **Administration of Persons With Disabilities (PWDs)**

2.17            **Rights of Persons With Disabilities (PWDs)**

**CHAPTER 3**

3.1            **Fire Hazard**

3.2            **Firefighting Concept within Bahria University**

3.3            **Risk Assessment**

3.4            **Layout Plan of Buildings**

3.5            **Fire Audit**

3.6            **External Audit**

3.7            **Combustible Material**

3.8            **Use of Wood and other Inflammable Materials**

3.9            **Dangerous Conditions (Fire Safety)**

3.10           **Unwanted Fire Alarm Signals (UFAS)**

3.11           **Fire Actions Display**

### **List of Annexures**

<b>Annex A</b>	<b>Occurrence Report Performa</b>
<b>Annex B</b>	<b>Safety Check-List</b>
<b>Annex C</b>	<b>Persons With Disability (PWDs) Act 2020</b>
<b>Annex D</b>	<b>Guidelines for calculating the number of fire team</b>
<b>Annex E</b>	<b>Types of Fire and Recommended Fire Extinguishers</b>
<b>Annex F</b>	<b>HEC CORVID -19 Guideline</b>
<b>Annex G</b>	<b>Dengue fever</b>
<b>Annex H</b>	<b>Hostel hygiene</b>
<b>Annex J</b>	<b>Guideline on personal hygiene</b>
<b>Annex K</b>	<b>Sickbay staff responsibilities</b>
<b>Annex L</b>	<b>Sickbay SOPs</b>

## **CHAPTER 1**

### **Introduction to Safety Policy**

1.1 **Safety Policy.** Observing high standards of Health, Safety, and Environment (HSE) is an integral aspect of our day-to-day life at the campus. Everyone must remain vigilant at all times. Everyone must be aware of the need to observe safe working practices and implement all controls, which have been promulgated through this policy. Everyone also has a legal and moral duty to report unsafe conditions, and if possible methods and means of achieving continuous improvement. This Health, Safety, and Environment (HSE) Policy for Bahria University is published for the information of all employees, students, and contractors to play their role to make life at campus safe in all respects.

1.2 **Policy Statement.** Bahria University is committed to providing a safe environment for its staff, students, and visitors. Part of this safety responsibility is in the provision, management, and implementation of Safety systems and procedures. The overriding factor in achieving an entirely safe environment is in the participation of all and sundry working in various campuses and offices of Bahria University. Thus, all members of the Bahria University Head Office (BUHO) and respective campuses/ CUs have a responsibility in ensuring compliance with the safety provisions defined within this policy. It is therefore urged upon all, especially those holding senior positions in the University, to ensure all works undertaken in their Area of Responsibility (AOR) are safe.

1.3 **Policy Framework.** This Safety Policy applies to all premises and activities falling, to any extent, under the University's control. The policy sets down the framework, through which the University management and all members of the University community are expected to undertake their duties. The Campuses Management holds the responsibility for compliance with the promulgated instructions devolved to various tiers of administration through the relevant Heads of Departments (HODs).

1.4 **Aim.** To provide a mechanism to ensure the safety of everyone at Bahria University while protecting the University's assets.

1.5 **Preamble.** Safety can only be achieved through a system in which everyone contributes. This policy provides the framework in which everyone has a role and responsibility. This policy defines the framework, responsibilities of the implementation of safety in the workplace. However, suggestions for improvement are most welcome. After all, safety remains a collective concern.

1.6 **Applicability.** The Safety Policy shall be applicable to the following:

- a. Bahria University Head Office (BUHO)
- b. All campuses of Bahria University including BUMDC
- c. Business Incubation Center, Islamabad.
- d. Institute of Professional Psychology (IPP).
- e. National Institute of Maritime Affairs (NIMA)
- f. Maritime Science and Technology Park (MSTP)
- g. Office of Research, Innovation & Commercialization (ORIC)

1.7 **Conflict in Orders.** The contents of this policy do not supersede orders or instructions issued from time to time by BUHO or campus administration. The conflict or divulgence, if noticed, may be forwarded to the Safety Directorate.

1.8 **Understanding Safety.** Fatality is the result of continuous negligence at various tiers of administration. The managers at various levels have to observe all jobs performed in their AOR with reference to safety. Without careful monitoring safety cannot be achieved. The target is to pre-empt an occurrence.

1.9 **Occurrence.** The definition of an occurrence is “An unplanned event or series of events that result in injury, death or material damage”. Good safety management can prevent an occurrence from happening.

1.10 **Reporting an Occurrence.** Campuses/CUs are to use discretion while deciding about reporting an occurrence to BUHO (Safety Department) depending on the severity and likeliness of recurrence of the incidence through the quickest possible means of this policy. Initial information can be passed through a phone call followed by the Occurrence Report Performa at Annex A.

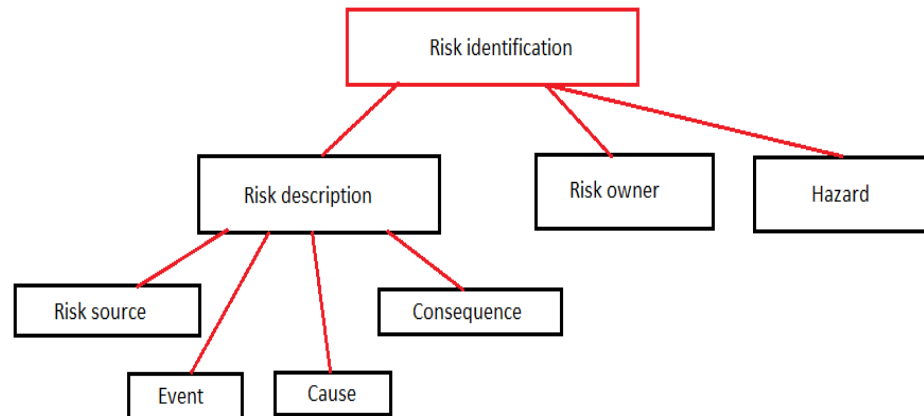

1.11 **Investigating an Occurrence.** An occurrence is to be thoroughly investigated to assess the root cause at the discretion of the campus administration depending on the severity and probability of recurrence. The summary and lessons learnt may be forwarded to other campuses to adopt safety measures as deemed appropriate.

1.12 **Risk Management Process.** Risk management is a step-by-step process for controlling health, safety and environmental risks caused by various hazards in the workplace. Everyone is to look around their workplace to detect and counter these risks to avoid an accident. The below-given diagramme depicts the steps to carry out effective risk management.

Diagramme: Risk Management Process Flow Chart

1.13 The steps of risk management are as follows:

a. **Identify the Risk.** Although safety is the concern of every individual, those associated with HSE have greater responsibility to go around the entire campus area, find what may cause harm to men and material and manage it till it is either removed or brought to safe limits. The below-given table explains the process of risk identification:

Now observe closely and note the following:

- (1) How people are working and how the equipment is being used.
- (2) Whether the substances being used are safe.
- (3) What safe or unsafe work practices exist.
- (4) The general state of your premises.
- (5) Note the non-routine works being undertaken, such as maintenance, installation of machinery/equipment.
- (6) Note the hazards to health, such as manual handling, use of chemicals and causes of work-related stress.
- (7) For each hazard, note how employees, contractors, visitors, or students might be harmed.

b. **Analyse the Risks.** Risk analysis identifies the causes and potential impacts of risk, qualitatively. Once you have identified the hazards, decide how likely is it that someone could be harmed and how serious it could be. This is assessing the level of risk. It is advisable to use the Risk Assessment Matrix given below to assess risk.

c. **Evaluate the Risk.** It is the quantitative part of the risk assessment. Risk evaluation is when you define the seriousness of the risk in relation to other risks. A Risk Assessment Matrix, also known as a Probability and Severity risk matrix, is designed to help you minimize the probability of potential risk to optimize project performance. The risk matrix is a way to increase the visibility of risks based on multiplying the likelihood that an event will occur by the impact the event will have on the organization.

$$\text{Risk} = \text{Probability} \times \text{Severity}$$

RISK MATRIX						
PROBABILITY →	Very Likely - 5	5	10	15	20	25
	Likely - 4	4	8	12	16	20
	Possible - 3	3	6	9	12	15
	Unlikely - 2	2	4	6	8	10
	Very Unlikely - 1	1	2	3	4	5
		1	2	3	4	5
		<i>Negligible</i>	<i>Slight</i>	<i>Moderate</i>	<i>High</i>	<i>Very High</i>
		SEVERITY →				
Risk	Risk Level	Action				
1 to 6	Low Risk	May be acceptable but review task to see if risk can be reduced further				
8 to 12	Medium Risk	Task should only be undertaken with appropriate management authorization after consultation with specialist personnel and				
15 to 25	High Risk	Task must not proceed. It should be redefined or further control measures put in place to reduce risk.				

### Risk Assessment Matrix

d. **Treat/Control the Risks.** See what measures to control the risk are already in place. Control measures are the things you put in place to reduce risk and prevent harm. A successful risk assessment must check existing controls, and consider if you need to do more. The hierarchy starts with the controls perceived to be most effective and moves down to those considered least effective, it flows as follows:

In addition, consider the following:

- (1) Can the hazard be removed altogether?
- (2) If not, how can the risk be controlled so that harm is reduced?
- (3) If you think further controls are required, consider the following:

- (a) Can the job be redesigned?
- (b) Identifying and implementing practical measures needed to work safely.
- (c) Provide personal protective equipment and make sure workers wear it.
- (d) Put the identified controls in place. It is not expected to eliminate all risks but everything 'reasonably practicable' should be done to protect people from harm. This means balancing the level of risk against the measures needed to control the real risk in terms of money, time or trouble.

e. **Monitor and Review.** The review is a continual process. Experts from outside should be invited periodically to review the risk management measures for improvement in the system. They should also be reviewed if:

- (1) They may no longer be effective

(2) There are changes in the workplace that could lead to new risks such as changes to staff, the process or the substances or equipment used.

(3) When problems have been spotted or there have been any accidents or near misses.

1.14 **Buddy System.** The buddy system is a procedure in which two individuals are paired together for mutual safety in a hazardous situation. The "buddies", operate together as a single unit so that they can monitor and help each other during disasters like fire and earthquakes. The buddy system is working together in pairs in a large group. Every individual working or studying at Bahria University has to be formally organized in Buddy System at various tiers of administration.

1.15 **Safety Check-List.** The Safety Check-List has been enclosed at Annex B to this policy for implementation and compliance. The same shall be used as a reference during Safety Audits of respective campuses and constituent units. Contributions for improvement in the Check-List are welcomed.

1.16 **Reference Publications.** The following publications are hereby promulgated as reference documents. Both the books are available on the net and can be downloaded for implementation as and where required.

a. **Building Code of Pakistan Fire Safety Provisions – 2016.** The book **Building Code of Pakistan Fire Safety Provisions – 2016** promulgated by Pakistan Engineering Council, Government of Pakistan is to be taken as a guideline reference for construction of buildings, Fire and Disaster Management planning and execution including high rise buildings.

b. **Daycare Centers.** The book “**Guidelines and Standards for Day Care Centers**” published by the Government of Punjab is to be taken as guideline reference for managing daycare centers at Bahria University Campuses.

1.17 **Feedback.** Feedback is a very important tool not only for improving the safety environment of the university but it makes the safety policy, safety instruction and SOPs more practical and relevant. It is therefore urged upon all safety managers to extend the feedback system down to the grassroots level.

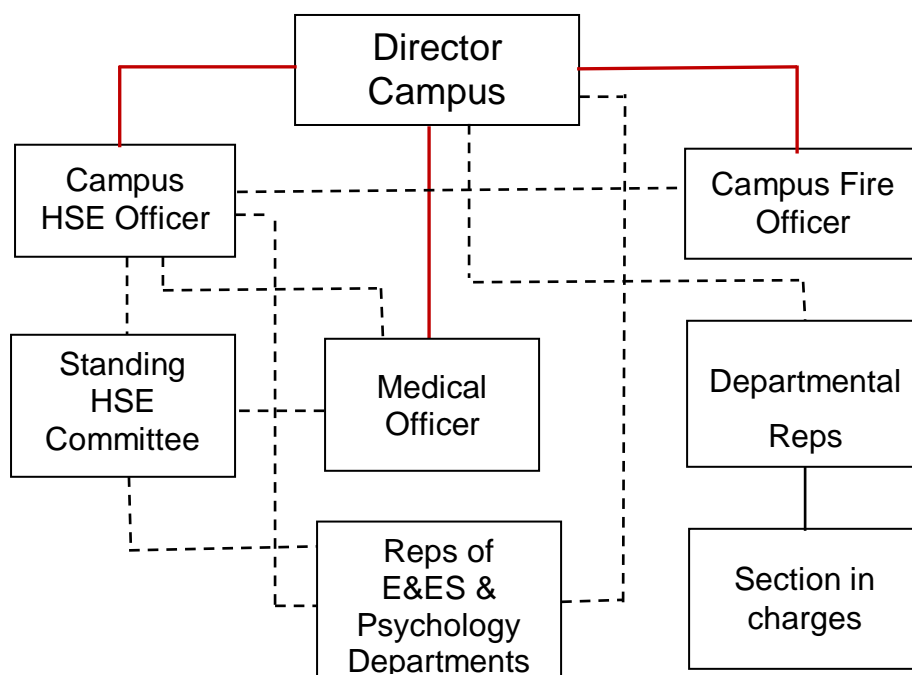

## **CHAPTER 2**

### **ORGANISATION AND MANAGEMENT**

2.1 **HSE Organisation.** All campuses/CUs of Bahria University are to have an effective Health Safety and Environment (HSE) organisation. The overall responsibility rests with the Director Campus, however, all Directors, HODs and departmental officers shall be responsible for their Area of Responsibility (AOR).

2.2 **HSE Management Hierarchy.** The existing management hierarchy of Bahria University's various campuses should be used for addressing HSE issues. However, the HSE Officer of each campus and constituent unit is to be taken in the loop. The HSE organisation flow chart is given below:

#### **HSE ORGANISATION**

#### **Legend**

Administrative Linkage ———

Functional Linkage - - - - -

2.3 **HSE Officer.** All campuses and constituent units of Bahria University are to designate a suitably qualified officer as HSE Officer. The HSE Officer is to work directly under the Director Campus.

2.4 **Standing HSE Committee (SHC).** In order to involve all stake holders into HSE affairs, each campus is to have a Standing HSE Committee.

Representation from all departments should be ensured. The structure of the committee is as follows:

Departments	Status
HSE Officer	President
Rep of E & ES Department	Permanent Member
DD (Tech)	Permanent Member
DD (A&C)	Permanent Member
Medical Officer	Permanent Member
Reps of all departments	Members

2.5 **Fire Officer.** All campuses and constituent units of Bahria University are to designate a suitably qualified officer as Fire Officer. The Fire Officer is to work directly under the Director Campus.

2.6 **Section In-charges and Onus of Responsibility.** The term “Section-In Charge” has been used to refer to those in charge of a certain section e.g. offices, labs, workshops, transport, library etc. This term should be taken to include Heads of Departments, Heads of Sections and those who lead units within the University Management hierarchy in their relevant AOR.

2.7 **Risk Assessment.** The Standing HSE committee in coordination with each department is to carry out risk assessment of the premises to identify any compromise to the safety of men and material and is to take corrective measures to ensure safety.

2.8 **Reporting Channel.** Each section-In Charge shall report any HSE compromise observed within his AOR to the campus HSE officer. However, if the matter is of urgent nature (e.g. Fire, injury etc.) he is to immediately report the matter to the relevant department.

2.9 **Scrutiny of Civil Works.** All civil works are to be scrutinized for safety by the campuses for safety aspects prior approval.

## 2.10 **RESPONSIBILITIES**

### 2.10.1 **Duties – Deputy Director HSE - BUHO**

- a. Supervise the work of HSE department at Bahria University Head Office.

- b. Oversee the safety of all campuses/CUs of Bahria University.
- c. Supervise the work of Standing HSE committees of various campuses/CUs.
- d. Promulgate Health, Safety and Environment Policy to enhance safety at BUIC and keep it up to date.
- e. Ensure instructions promulgated in HSE Policy are followed at each Campus/CU.
- f. Issue Safety Check List/SOPs for each stream of work being conducted at various Campuses/CUs of Bahria University to prevent an unsafe act.
- g. Conduct Safety Audits and follow up the observations.
- h. Conduct/arrange HSE training for various campuses/CUs of Bahria University.
- j. To serve as link between Pro-Rector Admin and various Campuses/CUs of Bahria University on HSE issues.
- k. Develop a HSE feedback system from various Campuses/CUs on safety matters.
- l. Analyse HSE related occurrences, incidence and near miss situations and propose preventive measures.
- m. Conduct Safety Review as and when required.

#### **2.10.2 Standing Health, Safety and Environment Committee (SHSEC).**

The duties of SSC are given below:

- a. The committee shall be responsible to develop and implement HSE standards at the campus.
- b. The committee is to conduct HSE audit at regular intervals.
- c. Hold meetings to discuss the safety issues at the campus on regular basis. The minutes of the meetings are to be recorded and progress monitored in subsequent meetings.
- d. The important issues requiring attention of BUHO are to be forwarded to HSE Directorate at (BUHO).

2.10.3 **Campus Administration.** All Deans, HODs and Departmental Heads are responsible to the Director Campus for the safety within their AOR. While doing so they have to pay attention to the following aspects:

- a. Ensure that the instructions, Standard Operating Procedures (SOPs), HSE Check-Lists promulgated by the University Administration are strictly followed.
- b. Ensure that facilities and equipment provided meet requirements of a safe work environment for activities being conducted. The SOPs should be revised where required to ensure compliance with applicable rules and regulations.
- c. Ensuring areas under their management are in compliance with the University HSE policy.
- d. Ensure that thorough Risk Assessment and Management is carried out for all activities taking place within their AOR. The same shall be part of the HSE Audit conducted from time to time.
- e. Ensure that Section-In Charges have been nominated for all spaces in their departments and no space have been left un-allocated. The duties of Section in Charge are given in the ensuing paragraphs.

2.10.4 **Faculty and Staff.** Faculty and Staff of each department is responsible for the following:

- a. Implement the University HSE policies and check-lists in their AOR.
- b. Promptly report unsafe conditions, hazards, injuries and illnesses to the relevant office in addition to HOD.
- b. Ensure participation of their students and staff in HSE trainings and drills.
- c. Promote HSE awareness in their AOR.

2.10.5 **Section In-Charges.** The term “Section-In Charge” has been used to refer to those in charge of a certain section e.g. labs, workshops, transport, library etc. The responsibilities of the Section-In charges are as follows.

- a. To undertake risk assessment of his AOR and report the same to the HOD/Departmental Head. Ensure that suitable remedial measures are undertaken in consultation with Campus HSE Officer.
- b. To ensure that all aspects of HSE are looked after in the light of instructions promulgated by the BUHO/Campus HSE Officer.
- c. Ensure that Buddy System is enforced and updated frequently to accommodate changes caused by joining and leaving of employees and

students. He is also to ensure that the people under his AOR are familiar with buddy system, emergency escape routes and muster areas.

- d. To ensure that all staff receives HSE training at regular intervals. The campus HSE exercise can be utilized for training of staff.
- e. To liaise with the campus HSE officer on all HSE matters.
- f. Proactively monitor waste and ensure it is stored away from buildings within designated premises.

2.10.6 **Senior Medical Officer (SMO).** The SMO of each campus is to ensure the following:

- a. The University campus is safe guarded against spread of infectious diseases.
- b. The Campus Sick Bay is adequately equipped to meet emergencies.
- c. The hygienic conditions at the campus are well maintained.
- d. Ambulances are readily available for emergency use.
- e. Liaison with nearby medical facilities.
- f. Record of recurring cases, cases requiring follow up is maintained and shared with Campus administration.
- g. Maintain high standard of potable water through regular testing.

2.10.7 **Human Resources Managers.** Human Resource Managers are to ensure that the commitment to HSE is written in each employee's job description.

2.10.8 **Campus HSE Officer.** Roles and tasks of campus HSE Officers are as follows:

- a. Carry out risk assessment of respective campus.
- b. Maintain close liaison with all stake holders.
- c. Increase HSE awareness as described in para 2.10
- d. Carry out analysis of occurrences at campus and promulgate corrective measures. The analysis may also be shared with BUHO and other campuses increase safety awareness.
- e. Promulgate instructions to improve HSE.
- f. Ensure guide lines/instructions are adhered.

- g. Conduct/ arrange HSE Training through CSP/ corporate resources.
- h. Conduct HSE Audit and follow up observations till they are adequately addressed.
- j. Hold quarterly SHC meetings and forward minutes to Director Campus and BUHO.
- k. Conduct HSE review as and when deemed appropriate.

2.10.9 **Deputy Director (Tech).** DD (Tech) of the campus is responsible for the following w.r.t. HSE:

- a. Ensure implementation of high standards of HSE provisions at the relevant premise.
- b. Fire warning and detection systems are maintained in accordance with the relevant standards.
- c. Firefighting systems are tested periodically, preferably over the weekend so that campus activities are not hindered.
- d. Emergency lighting, escape lighting and signage are maintained and tested in accordance with the relevant standard.
- e. Firefighting equipment including fixed installations are subjected to a maintenance programme in accordance with the manufacturer guidelines.
- f. Conduct preventive maintenance of all machinery and appliances and maintain record.
- g. Ensure safety of electric cables by managing load at distribution boards (DBs).

2.10.10 **Director/Deputy/Assistant Director (Admin & Coordination).** Director/ Deputy/ Assistant Director (Admin & Coordination) is responsible for the following with respect to HSE at the campus:

- a. Ensure that the entire campus is free of slip, trip and fall conditions.
- b. Ensure that the buildings are well maintained.
- c. Means of escape are maintained as per required standards given at Safety Check-List at annex B of this policy.
- d. Ensure that the passages are clear of obstructions.
- e. Nothing is stowed under the stairs.
- f. All rooms are numbered. Room numbering may indicate the building and floor e.g. NC101 (New Construction, First floor room No. 1)

- g. Designate emergency muster areas and mark them with paint.

2.10.11 **Duties relevant to Staff and Students.** Staff and students have a responsibility to comply with the HSE Policy. This will include, but not be limited to:

- a. Observing all instructions, information and training intended to secure high standard of HSE at the campus. Co-operating with the University staff on all matters relevant to HSE.
- b. Reporting any obvious defects or short-comings in the University HSE provisions, arrangements or procedures.

2.11 **HSE Audit.** The SHC is to conduct HSE audit of various buildings and department on regular basis and forward report to Director Campus.

2.12 **Students Handbook.** Instructions related to safety are to be included in the Students Handbook.

2.13 **Work Permit and Conduct of Contractors.** Any work involving fire risk; must be supervised. The concerned department is to obtain a work permit from the campus/constituent unit Fire Officer before starting the work. The contractors are to ensure that an appropriate level of safety provision is observed. Contractors will also be required to be made aware of the firefighting facilities close to the work site.

2.14 **HSE Awareness through Community Support Programme.** All HODs are to arrange basic HSE awareness training for students at least once in each semester through Community Support Programme (CSP). Award of suitable credit hours may also be considered.

2.15 **Promoting HSE at Campus.** All out efforts be made to promote HSE culture at campuses. Some traditional ways are suggested here, however, innovative ideas can be adopted to achieve the aim:

- a. Posters
- b. Seminars
- c. Workshops
- d. Reviews
- e. Courses

2.16 **Administration of Persons With Disabilities (PWDs).** Bahria University Head Office and campuses/CUs are to maintain list of all PWDs and make arrangements to facilitate them in studying and working in their Area of

Responsibility (AOR). The Rights of PWDs Act is enclosed at Annex C. Salient points are summarized below:

- a. **Ease of access.** BUHO and campuses are to provide ease of access to public buildings, medical centers, recreational facilities, Masjid, hostel gymnasium etc. Streets and roads to be appropriately modified to give easy access to these facilities. New buildings and vehicles shall be designed to provide easy access to these facilities.
- b. **Reserved Parking Slots.** BUHO and campuses are to provide reserved parking slots for PWDs and ensure that these parking slots are not used by others.
- c. **Accessible Toilets.** Accessible toilets are toilets that have been specially designed to better accommodate people with physical disabilities. PWDs with reduced mobility find them useful, as a higher toilet bowl makes it easier for them to stand up. For example, toilets may not be able to fit a wheelchair, and transferring between the wheelchair and the toilet seat may pose a challenge. Accessible toilets are designed to address these issues by providing more space and bars for users to grab and hold during transfers, and space for an assistant if necessary. BUHO and campuses are to provide sufficient numbers of accessible toilets in their AOR.

- d. **Priority Seats.** Priority seats in BU public transport vehicles may be reserved for PWDs to use public transport with an equal degree of access and comfort as other people. public transport, BUHO and campuses.

2.17 **Rights of Persons With Disabilities (PWDs).** Following issues be paid special attention and implemented in respective AORs of Bahria University. Detailed instruction can be seen at can be obtained from the Rights of PWDs Act enclosed at Annex C.

- a. Equity and non-discrimination of PWDs.
- b. Right to Privacy
- c. Women, Children, Elderly People and Transgender PWDs
- d. Ease of access and mobility
- e. Protection from abusive, violent and intolerant discriminatory behaviour
- f. Equity in Education
- g. Equity in Employment
- h. Equity in Health and Medical Rehabilitation Services
- j. Access to Justice
- k. Participation in sports, cultural and Recreational Activities
- l. Protection of PWDs in Risk and Disaster Situation

### **CHAPTER 3**

#### **FIREFIGHTING**

3.1 **Fire Hazard.** Fire is the most common safety risk and a vital threat to the University activities. An outbreak of even a small fire creates panic besides being a risk to both life, property, damage to the environment, and can compromise normal campus activities. A fire hazard can thus be understood as anything which significantly increases the likelihood of a fire occurring, intensifies a fire's spread, or increases the potential harm a fire could cause. It includes anything which impedes the function of fire protection material or equipment, as well as anything that inhibits fire safe behavior. For instance, an obstruction which impedes safe evacuation and a malfunctioning sprinkler system would both be considered fire hazards. This is because a facility's level of risk factors in both the probability that a fire will occur and the severity of the potential harm that could be caused by a fire increases in both the given situations.

3.2 **Firefighting Concept within Bahria University.** All campuses/CUs of Bahria University are to prepare and equip themselves to fight fire by carrying out initial attack and containment of the fire. If the fire is not immediately extinguished, PN/Civil Fire Brigades are to be called.

3.3 **Risk Assessment.** All departments should conduct fire risk assessment of their AOR as per procedure given at Chapter 1 of this policy in consultation with campus safety organisation. Subsequently, the firefighting, emergency evacuation, environment, health etc. plans should be prepared.

3.4 **Layout Plan of Buildings.** The lay out plan is to be displayed prominently at the entrance of each building for ease of conduct of emergency evacuation and firefighting.

3.5 **Fire Audit.** Standing HSE Committee (SHC) shall conduct fire audit of the entire campus on regular basis.

3.6 **External Audit.** It is advisable to arrange an external audit of the campuses from time to time for firefighting and emergency evacuation. Various departments may also opt for an external audit for their labs and other facilities as and when deemed appropriate.

3.7 **Combustible Material.** The impact of dangerous substances, when exposed to fire, can create a hostile and unpredictable environment. When such substances are stored and used within the University premises, particular attention is required for safe use and storage. Students and employees should be given exposure to dangerous substances in an appropriately controlled, supervised, and safe environment.

3.8 **Use of Wood and other Inflammable Materials.** The use of wood, being an inflammable material, is to be discouraged. Some of the common examples are as follows:

- a. **Wooden Flooring.** It has been observed during some recent fire incidences that fire does not spread on vinyl floorings. Its use in flooring is quite safe. Wooden floorings are to be gradually replaced with vinyl floorings in all campuses and constituent units.
- b. **Wooden Partitioning.** In some recent fire incidences, wooden partitioning added much to the fire. It is, therefore, recommended that aluminum and glass be used in partitions wherever required.
- c. **Wooden/PVC Paneling/False roof.** The wooden/PVC paneling and false roof not only adds to the fire but also conceals the actual condition of the wall/roof. At times worn-out electrical wire, connections, seepages, cracks, wasp nest, etc. goes undetected. The situation is revealed only when the matter has aggravated beyond economical repairs. It is, therefore, necessary to keep the walls and roofs in their original form.
- d. **Carpets.** Carpets are not only a fire hazard but a source of bacteria causing illness. Their use as flooring is not safe. The carpets in use should gradually be replaced with vinyl flooring or ceramic tiles.
- e. **Packing Materials.** It has been observed that the packing materials of newly purchased equipment are stored in offices/labs for perceived future use. However, they are seldom re-used. It is a fire hazard and should either be removed or kept in properly designated stores for safeties in place.
- f. **Weeding out of old Records.** Each department should pass specific instructions for weeding out of old records like correspondence, research papers, thesis etc. at regular intervals. The same needs to be implemented in letter and spirit. The offices' racks and cabinets should

never be overburdened with such records. Digital archiving can be a good option to replace paper records.

g. **Solid Waste Disposal.** Each campus and the constituent units should have an effective solid waste disposal plan. External waste containers and refuse bins are a potential fire hazard to all buildings. Fires often occur in such receptacles and where they are placed near a building. To ensure that this risk is eliminated, all such receptacles must be placed at a minimum distance of 6 meters from a building. In all cases, no receptacles should be placed directly adjacent to or below any window, door, or other openings of a building. The waste dumps should be kept well away from the fire high-risk areas like transformers, HT/LT rooms, generators, etc.

3.9 **Dangerous Conditions (Fire Safety).** Very often, during the course of firefighting, firefighters are exposed to dangerous conditions. Utmost care needs to be taken to safeguard the firefighter from such conditions such as burning, choking, falling or trapping in isolated spaces. It is the duty of each and every one present on the scene to keep a lookout and take remedial measures.

3.10 **Unwanted Fire Alarm Signals (UFAS).** Unwanted fire alarm signals are activation of the fire warning system activated by any effect other than fire. Such signals, ultimately harm the University's core business and also creates complacency, as well as eroding user confidence. Deputy Director (Technical)/ the maintenance officer is to ensure that the fire alarm system is maintained very well to avoid UFAS.

3.11 **Fire Actions Display.** Fire action notices are to be displayed at various points at conspicuous places on the premises. All employees are required to be familiar with these actions.

3.12 **Fire Warning System.** Fire Warning Systems are to be maintained and tested frequently. Any defect is to be rectified expeditiously. Record of maintenance is to be maintained by technical/firefighting staff.

3.13 **Duties of Firefighting Officer.**

- a. Raise an effective firefighting organization to effectively fight fire in his AOR.
- b. Undertake fire risk assessment of respective of his AOR.

- c. Ensure all firefighting assets are maintained through Technical Department by conducting daily and weekly inspections.
- d. Fire detectors are periodically tested and serviced.
- e. Conduct fire exercise regularly choosing high fire risk scenarios.
- f. To sign Work Permit Performa for hazardous work under taken by contractors after satisfying himself for safety arrangements.
- g. To ensure all the staff working in his AOR gets adequate firefighting training to maintain competence.
- j. Maintain liaison with local firefighting organizations.
- k. Ensure all fire incidents are investigated and necessary preventive measure are taken.
- l. Ensure that new members of staff are given instructions and training on firefighting and emergency procedures in consultation with the University Safety Officer.
- m. Ensure the posting of appropriate warning fire signs and notices and report deficiencies in the buildings.
- n. Draw the attention of the section in charge/Head of Department/ Director Campus and SSC of any deficiency/safety risk observed within his AOR.
- p. Ensure that adequate records are maintained in relation to:
  - (1) Fire Alarm testing (weekly).
  - (2) Fire Alarm maintenance (weekly).
  - (3) Electrical portable appliance tests (weekly).
  - (4) Staff fire safety training (weekly).

3.14 **AOR Firefighting Officer BUIC.** Bahria University Head Office (BUHO) building falls under the AOR of Firefighting Officer of BUIC in addition to Islamabad Campus.

3.15 **Composition of Firefighting Teams.** The guidelines for calculating the number of fire team is given at annex D to this policy. The composition of various firefighting teams at the campus shall be as follows:

a. **Central Firefighting Team.** Each campus and constituent unit shall maintain a **central firefighting team**. This team shall consist of Fire Officer and his staff. They shall be responsible for the maintenance of central firefighting equipment. They shall be responsible for firefighting at places like heating, ventilation, and air conditioning (HVACs) rooms, generator rooms, cafeteria, etc. Also, they are to augment **Building Firefighting Team** in case of fire inside a building. This team shall supervise the maintenance of equipment installed in buildings through Building Firefighting Teams.

b. **Building Firefighting Teams.** The in-charge of each building shall be the **firefighting supervisor** for that building. Each department housed in the building is to nominate at least one staff to form part of the building firefighting team so that the building firefighting team has at least one member for each floor from the department. The team shall be responsible to fight fire, maintain firefighting equipment and conduct of emergency evacuation in their respective buildings.

3.16 **Fire Fighting Equipment.** Firefighting equipment is to be placed within fire exit routes and adjacent to some specific high risks areas, such as computer servers, electrical transformers, etc. The extinguishers are to be operated by competent persons only when it is safe to do so without obstructing the escape route. **Under no circumstances should a fire be confronted without first raising the alarm.** All employees are to familiarise themselves with the extinguishers provided within their premises and the fire classification that may influence their use. Where any firefighting equipment has been used or is deemed unsatisfactory, the Fire Officer should ask for a replacement.

3.17 **Types of Fire and Recommended Fire Extinguishers.** In Pakistan, we follow the United Kingdom's classification of fire. The same is placed at annex E to this policy along with the recommended type of fire extinguishers.

3.18 **Maintenance Responsibility.** All the firefighting equipment on board is to be in the charge of the technical department of each campus/constituent unit. The equipment is to be maintained in full working condition at all times. Any defect arising in the said equipment is to be rectified on priority.

3.19 **Maintenance of Portable Fire Extinguishers.** In addition to the prevalent practices of handling and maintaining of portable fire extinguishers, following instructions are to be complied:

- a. In addition to the standard markings, weight when empty and when filled should be written on each portable fire extinguisher separated with slant sign. Example 20/25 kg.
- b. They should be inspected daily to check pressure (CO<sub>2</sub> and Altron), un-interrupted access and cleanliness by the department where it is placed.
- c. The Dry Chemical powder portable cylinders need to be thoroughly shaken once in a month to safeguard against hardening of dry chemical.
- d. They should be inspected monthly by the campus central fighting staff for weight, wear and tear etc.
- e. Gas or dry chemical should not be refilled unless reduction in pressure/weight is observed.
- f. The date for recharge should be extended by one year after the weight and general condition is found correct. There is no need to discharge the cylinder and refill again each year.

3.20 **Fire Extinguishing Ball.** The fire extinguishing ball is a light weight firefighting equipment and requires no training. It can be installed in a room or can be thrown into a fire and it will self-activate within 3 to 5 seconds. It is environmentally friendly, non-toxic powder, safe for people in the vicinity and requires no inspection and maintenance. It normally has a shelf life span of 5 years. It requires minimal training, no pins and no moving or mechanical parts. It has impulsive noise that raises a fire-alarm. It is effective in an area of 20 square meters. It may be noted that the subject ball will extinguish the fire immediately, however, the chances of re-ignition of fire shall remain there till the seat of fire is properly extinguished.

3.21 **Fire Extinguishing Ball Installation.** It is recommended that the fire extinguishing ball be installed in all high fire risk areas. Depending on the situation, more than one fire extinguishing balls can be installed. Owing to low cost, some fire extinguishing ball can be kept in ready use lockers for use in open spaces and other locations.

3.22 **Fire Pumps.** At least two fire main pumps are to be readily available to fight fire in all campuses. Out of them one has to be diesel driven for use without electricity.

3.23 **Replacement of Fire Hose.** Fire Hose reels shown in Figure A, consist of a length of non-kinking tubing and is a fire-fighting equipment designed to be used by any member of the general public especially inside the buildings. The fire hoses shown at figure B are suitable for use outside the buildings. In certain case, the fire hoses (Fig B) have been installed inside buildings at BU. They are to be provided with fire hose reels in addition as shown in figure A.

**Fire Hose Reel**

**Figure A**

**Fire Hoses**

**Figure B**

3.24 **Alternate Power Supply to Fire Main Pumps.** All fire pumps are to be provided alternate power supply with changeover switch. The location of breaker switch is to be written inside the pump room.

3.25 **Display of Fire and Emergency Services Contact Numbers.** The telephone numbers of campus, Pakistan Navy and civil fire and emergency services be displayed at the entrance of each floor of the building. These numbers are to be frequently checked and updated.

3.26 **High Fire Risk Areas.** Special attention is to be paid to high fire risk areas like server rooms, battery banks, HVAC compartments, diesel generators rooms, transformer rooms, fuel storage etc. Clear cut written SOPs are to be issued by the departmental officer for Standard Operating Procedures and safeties. Safety guidelines are given at safety check list at annex B to this policy.

3.27 **Fire and Rescue Vehicle.** All campuses are to ensure that fire and rescue vehicle has an unobstructed access to all buildings and high fire risk areas.

3.28 **Laboratories Safeties.** General laboratory safeties are given at Safety Check List at annex B to this policy; however, lab specific safety instructions be issued and displayed clearly by respective department.

3.29 **Server Rooms Safeties.** Server rooms and their associated battery banks are high fire risk areas. They normally have additional firefighting system in addition to the existing facility. These areas deserve special attention to prevent fire.

## **CHAPTER 4**

### **EMERGENCY EVACUATION**

4.1 **Emergency Evacuation Plan and Drills.** The management of each campus is to ensure that a comprehensive emergency evacuation plan is prepared and enforced. The contents of the emergency evacuation plan are discussed in detail in the ensuing paragraphs. The emergency evacuation drill should be conducted in collaboration with the local fire brigade and rescue agencies at least once in six months during semesters involving all staff and students. The drills should be avoided during times, such as exams and conferences, however, consideration should be given to ensuring advantage is taken of peak occupancy times. Since constant disaster readiness is essential, all employees should be trained and put through evacuation drills to ensure that the process will proceed smoothly in the event of an actual emergency. The detailed instructions are given in the Safety Check-List at Annex B to Safety Policy.

4.2 **List of Occupants.** Departments are to forward floor-wise occupancy plans for their departments to Deputy Director (Admin & Coord), campus firefighting officer, and building in-charges. The list is to be kept up to date to absorb changes at least once in six months.

4.3 **Buddy System.** The Buddy System is to be enforced in letter and spirit at all tiers of administration at the University. All the staff and students are to be organized in Buddy System. All HODs, DDs and departmental heads shall be responsible to prepare Buddy lists and keep them up to date. In case of an emergency, it will be their responsibility to conduct Buddy Check in the Muster Area and report any discrepancy.

4.4 **In-charge Emergency Evacuation.** Bahria University campuses and constituent units are equipped to fight small-scale fires. The large-scale fire involving evacuations shall be handled by Pakistan Navy/ civil fire brigades. Therefore, the campus firefighting officer is to act as the in-charge of the emergency evacuation.

4.5 **Access to Buildings.** It may be ensured that the road access to buildings is clear of obstructions, wide and high enough to allow fire and rescue vehicles (e.g. snorkel machine) to operate freely. The dimensions of the said vehicles can be obtained from respective fire and rescue services.

4.6 **Special People Rescue.** Special People or people with special needs or people requiring special assistance should be paired with at least two persons capable of rendering assistance in an emergency evacuation. All those clearing the area are to pay special attention to the safe and timely exit of all such people and render assistance where possible.

4.7 **Exit Routes.** All exit routes are to be indicated by signage. To ensure exit route passage is not compromised, no equipment or materials may be placed or stored within any protected exit route or protected stair enclosure. All exits must be maintained clear, free from any obstruction and all final exit doors require to be easily and immediately openable from the direction of travel. Additionally, the surface finish to wall linings within stair enclosures and protected routes should be maintained free from any form of combustible wall decorations. Corridors and stairways that form part of escape routes should be kept clear and hazard-free at all times. Items that may be a source of fuel or ignition should not be located within escape routes, such items include; portable heaters, cooking appliances, upholstered furniture, coat racks, vending machines, gas pipes and meters, photocopiers and other electrical equipment, seasonal decorations and display or exhibition material. Detailed instructions are given at Safety Check List at annex B to this policy.

4.8 **Emergency Muster Area(s).** All campuses and constituent units of Bahria University are to designate a suitable muster area to be used for gathering people after the evacuation of the building in event of fire, earthquake, or any other emergency. Depending on the number of occupants, the layout of the building(s), availability of free space, there can be more than one muster area for one building. In case of fire, the rooftops can also be used to access emergency egress, therefore, all the doors leading to the rooftops are to be kept open. While designating the muster area following aspects be given consideration:

- a. Have an easy access from the concerned building(s).
- b. The access should be free of obstructions, slips, trips and falls.
- c. Should be well clear of buildings to avoid debris falling from the building(s).
- d. Should be clear of the access route of the fire tenders and emergency vehicles and fire/emergency handlers.
- e. Large enough to accommodate all personnel of the building(s).
- f. Have lighting arrangements for any emergency at night.

4.9 **Calling Numbers for Assistance.** The internal and external emergency numbers should be displayed on every floor at conspicuous spaces. Anyone reporting the fire or other emergency should first call the University emergency numbers. If he feels that the fire situation is getting out of control, should call the nearest Fire Brigade center.

4.10 **Actions on Receiving Fire/Emergency Alarm and Earthquake.** Detailed instructions on emergency evacuation are given in the safety checklist given at annex B to this policy. However, some important points are summarized as follows:

**Never** ignore or assume the alarm is false or the result of a test.

- a. Everyone **must** evacuate the building by way of the safest and closest exit/or stairway.
- b. **Never** use an elevator to exit during a fire alarm activation.
- c. Once outside the building, **move away from the building**. Assemble at the designated muster area.
- d. **Do not obstruct** the access to the building where the fire fighters and fire trucks will be operating.
- e. If there is an incident occurring on the upper floors and glass is being blown out of the windows, the area below is the hazard zone where serious personal injuries will happen. **Do not remain in or near the hazard zone.**
- f. Once outside, never re-enter the building until you are told to do so by the University administration.
- g. Assist those who need help, but do not put yourself at risk attempting to rescue trapped or injured victims.
- h. Note location of trapped and injured victims and notify firefighters.
- J. Walk calmly but quickly to the nearest emergency exit.
- k. Keep to the right side of corridors and stairwells as you exit and avoid congregating at any exit point.
- l. Proceed directly to your designated muster area.
- m. Remain in the muster area until roll call is taken and buddy check is completed.

4.11 **Use of Lifts.** The use of lifts during a fire, earthquake and other emergencies is strictly prohibited. They may be used only after the risk assessment has been done and its use is considered safe.

4.12 **Emergency Evacuation – Day Care Center.** The daycare centers at all campuses are to be run in accordance with the instructions given in the guidelines given in article 1.16b Chapter 1 of Safety Policy. Some of the salient points are given here.

- a. In charge Day Care Center must establish emergency rules and procedures, including an evacuation plan and escape routes to be used in the case of fire, earthquake and other emergencies.
- b. The evacuation plan must be posted at each designated play room exit and each exit from the day care centre.
- c. The plan should provide for the following points:
  - (1) Shelter of children during an emergency including shelter in place at the day care centre and shelter at locations away from the day care centre premises.
  - (2) A method for staff to contact parents as soon as possible when an emergency situation arises.
  - (5) A current list of emergency telephone numbers, the Sick Bay, etc.
  - (6) The specific evacuation duties of each staff member.
  - (7) The location of a safe muster area which must be outside the day care center and known to the children and staff.
  - (8) The route to the muster area should be cleared of people to avoid caught in stampede.
- d. The in charge day care centre must carry out an emergency evacuation drill at least once in six months.
- e. The emergency plan should be approved by the relevant Director Campus.
- f. The in-charge Day Care Center shall review the emergency plan at least annually and update the plan as needed.
- g. Each review and update of the emergency plan shall be documented in writing.

4.13 **Emergency Evacuation Training.** The training on Emergency Evacuation has been covered in para 5.8 Chapter 5.

## **CHAPTER 5**

### **TRAINING**

5.1 **Training Organisation.** The Health, Safety and Environment (HSE) officer of each campus/constituent unit shall be responsible for the training of safety, firefighting and emergency evacuation. He is to organize HSE training within campus. However, departmental officers shall remain responsible to organize and conduct training within their departments. equipment-specific training shall be arranged by the respective HOD/departmental officer from the original equipment manufacturer (OEM). Training and exercises involving more than one department like emergency evacuation etc. are to be coordinated with Director Campus through HSE officer.

5.2 **Scope of Training.** The concept of providing safety and firefighting training is to have enough number of qualified firefighters in each department and on each floor of various buildings/facilities. The training should primarily be focused on the following two types of personnel:

- a. **Train the Trainer.** Training to those who have already been trained e.g. ex Pakistan Navy personnel with a view to produce trainers.
- b. **Training to Novice.** The training to novice is to produce as many fire fighters as possible to fight the fire effectively.

5.3 **Training Facilities.** To avail quality formal HSE training, the local sources are to be explored for each campus. For firefighting, the National Institute of Fire Technology is recommended for Islamabad, while for Karachi NBCD School Karsaz and Federal Civil Defence Training Institute are recommended. Necessary liaison with the institutions is to be done by the respective Campuses.

5.4 **Role of Students Support Center.** The platform of Students Support Center for conduct of training be considered at campus level. Allocation of credit hours for HSE training may also be considered.

5.5 **HSE Training through Leadership Development Center.** To enhance the level of HSE awareness and improve safety practices at campus, Institution of Occupational Safety and Health (IOSH) and National Examination Board in Occupational Safety (NEBOSH) training is recommended. These trainings can be arranged through Leadership Development Center (LDC). Yearly training forecast be shared with LDC through DD HSE at BUHO.

**5.6 Training to Faculty Members.** To enhance awareness and involvement amongst all concerned, the faculty members may also be included in the various training programs.

**5.7 Weekly Fire Exercise and Lectures.** All Campus Safety and Firefighting Officers are to conduct the subject training in a manner that every person in the University receives formal training.

**5.8 Emergency Evacuation Drills.** The emergency evacuation and firefighting drills are to be conducted once in six months by the campus administration. The drills are to be coordinated with the campus schedule of events. The following points are to be considered while planning the drills:

- a. All staff, faculty and students of the building are to be involved.
- b. The time of maximum occupancy is to be chosen. However, the drills should not be scheduled during exams and other major activities of the campus.
- c. Pakistan Navy/Civil fire and rescue agencies along with rescue vehicles are to be involved.
- d. Actual fire and rescue machinery is to be used.
- e. Different buildings are to be selected each time with every possible scenario.
- f. The agencies involved be asked to forward observations on the drills for improvement in the campus safety, fire drills and equipment.

**5.9 Documentation of Training.** Every training imparted to the staff/faculty is to be documented for future utilisation in safety and firefighting efforts.

## **CHAPTER 6**

### **ENVIRONMENT PROTECTION**

6.1 **Importance.** Environment plays an important role in healthy living and the existence of human life. Earth is a home for different living species. We all are dependent on the environment for food, air, water, and other needs. Therefore, every individual needs to save and protect our environment. This chapter aims to formulate and implement policies that improve the environment at various Bahria University Campuses/ CUs. An attempt has been made to raise the level of understanding about the environment putting in place a framework where everyone joins hands to produce a healthy environment not only at BU but in various other places.

6.2 **Bahria University Environment Policy.** The Environment Policy sets the high-level objectives for the Environmental Management Plan which include:

- a. Minimizing the carbon/ environmental foot-prints via conservation of natural resources for future generations through improvements in energy efficiency.
- b. Developing effective material management (from raw to waste).
- c. Increasing awareness of environmental responsibility among staff, students and visitors to the University.
- d. Having an environmental management system that ensures the University complies with national environmental standards.
- e. Taking into account environmentally sustainable initiatives in new construction projects and renovations.
- f. Maintaining the University premises in an environmentally sensitive way, having regard to the protection of natural habitats and local wildlife.
- g. Promoting and encouraging sustainable forms of mass travel and transport by staff and students to reduce carbon emission.
- h. Striving to continually to improve the University's environmental performance.
- j. Ensure provision of clean and safe potable water at the university.

**6.3 Organisation.** The Director of respective campus shall be responsible for the preparation, implementation and audit of the Environment Management Plan (EMP). HOD Earth and Environment Sciences (E&ES) shall render help to all campuses in the city in preparation of EMP as shown below. However, the implementation remains the responsibility of each campus. Similar help is to be provided to all Bahria university setups coming up in the future as well.

- a. BUKC, BUM&DC Karachi etc. E&ES department Karachi
- b. BUIC, H-11 campus, BUM&DC Islamabad etc. E&ES department Islamabad Islamabad etc.

**6.4 ENVIRONMENTAL MANAGEMENT PLAN (EMP).** This Environment Management Plan (EMP) establishes a mechanism for delivering on the aims and objectives of BU's Environmental Policy. (EMP) assigns and defines the roles and responsibilities of management to meet the requirements for maintaining environmental quality. Each campus/ CU of Bahria University is to formulate EMP of its own and implement it. The expertise of faculty members (E&ES deptt) may be utilised to promote the effective planning and implementations. Incentive may also be considered for the subject work. The flow chart of Environment Management Policy is given below:

**Flow Chart of Environmental Policy**

### 6.5 The Purpose of the EMP

- a. Promote healthy environment through implementation of environment standards and procedures.
- b. Prevent workplace illnesses caused by poor environment.
- c. Avoid property losses or damage.
- d. Protect the environment by reducing adverse impacts.
- e. To highlight the environmental aspects of University operations and manage the impact of those aspects.
- f. To ensure a continuous improvement loop is established and maintained.

6.6 **Components of the EMP.** The main components of the EMP includes the following:

- a. **Organizational Structure.** The EMP has to function under the supervision of Director Campus. The HOD E&ES Islamabad/Karachi is to advise Director Campuses/CUs on environment issues.
- b. **Monitoring Requirements.** The EMP has many components spread over wide range of activities falling under the management ambit of different departments. Each department is responsible of its part of environment protection efforts. However, the overall monitoring responsibility shall rest with E&ES department. Standing HSE committee meetings are appropriate forum to discuss and resolve various environmental issues.
- c. **Training Requirements.** All the areas of this plan assign roles and responsibilities to personnel employed in different sections of administration and faculty. E&ES department is to identify the training needs and arrange courses at campus level. HSE directorate at BUHO is to be kept informed on conduct of the trainings. Any training requirement requiring assistance/approval of head office be forwarded to HSE directorate BUHO. Proposed training programmes are as follows:

<b>Training Required</b>	<b>Target Trainees</b>	<b>Suggested Frequency</b>
Chemical Hygiene Training	Students & staff working in laboratories	Initial and Annual
Waste Management Training	All administrative personnel, faculty & students, bottom staff	Initial and Annual
Lab Ventilation Training		Initial and Annual
Safety Orientation and Right-To-Know Training	for individuals who don't work with chemicals (potential affectees)	Initial and Annual

d. **Communication and Documentation.** All activities in and outside the campus falling under the ambit of promoting environment safety are to be recorded as paper and electronic documents as evidence. All procedural/ documentation revisions are to be communicated to E&ES department Islamabad under intimation to Safety directorate at BUHO.

6.7 **Scope.** The scope of the EMP will focus on the following categories:

- a. Waste Water/Storm Water Management
- b. Solid Waste Management
- c. Noise & Air Monitoring and Management Options
- d. Green Energy

#### 6.8 **WATER MANAGEMENT**

6.9 **Waste / Storm Water Management.** The purpose of the adopted procedure is to provide guidelines and simplify the process to quantification and proper disposal of wastewater wherever and whenever arising during the BU project's construction and operation phase. Regularly review opportunities for reduction of mains water consumption.

6.10 **Waste Water Minimization and Re-use.** The under mentioned points are to be taken into consideration to reduce and re-use the waste water at campus. However, they are not exhaustive; new and innovative ideas are welcomed.

- a. A thorough inspection of the campus to identify spots where better management can reduce the use of water.

- b. Installation of metering system at key water consumption points to evaluate/reduce water consumption. Readings from the meters+ to be taken on quarterly basis.
- c. During construction, extensive management schemes are to be formulated for conservation of water.
- d. Rain/storm water harvesting mechanisms to be installed for collection and storage of rain water for further not potable uses (laundry, washroom, maintenance of green areas etc).
- e. Used water from wuzoo at Masjid/prayer sites can be treated and used for maintaining greenery at the campus.
- f. installation of water sprinklers for gardening purposes.
- g. Use of solar geysers instead of gas dependent geysers for water heating purposes during winters.
- h. The sewage water be collected in septic tanks, treated and used for plantation (recycling and reuse).
- j. Display of small size posters/notices for water conservation at key point of usage.

6.11 **Septic Tanks.** Septic tanks decompose sewage through bacterial activity before draining water to main lines. All campuses/CUs are to make arrangements to ensure sewage is treated through septic tanks before discharge to main lines. Since discharge of hazardous effluents is rare from an educational facility, chemical treatments may be employed, if financially feasible, before their discharge to sewage. The construction of septic tanks is to be made mandatory in all new/under construction buildings at BU.

6.12 **SOLID WASTE MANAGEMENT PLAN.** Waste management is a critical component of management's operating policies. The purpose of this procedure is to provide guidelines for sustainable approach and to avoid any residuals which can negatively impact the campus environment. To carefully control any materials which are discharged to air, land, sewer or water course to protect human health and the environment. This includes waste of under construction building. The pragmatic components of waste management to be employed by respective BU units include:

- a. Proper handling, sorting, collection and storage in dedicated bins based on waste type.
- b. Delivery to respective city district management's waste collectors.

- c. Waste Recyclers (for paper, plastic, glass).
- d. Provide waste awareness and publicize waste reduction.

6.13 **Principles of Solid Waste Management.** Basic principles of solid waste management are as follows:

- a. Eliminate waste production whenever and wherever possible. Use the material only for its intended purpose on site.
- b. Minimize waste production
- c. Reuse where possible.
- d. Dispose waste through properly designed waste disposal facility.
- e. Storage and safe handling.

6.14 **Instructions for Solid Waste Disposal are as Follows:**

- a. All non-construction wastes awaiting disposal shall be kept in closed containers. Care must be taken to prevent wastes giving rise to secondary environmental problems, such as odors or soil and groundwater contamination through rainwater leaching.
- b. All bins are to be emptied as many time in a day as required.
- c. In no case waste is to be left in the bins overnight.
- d. All bins are to be sleeved with bio degradable plastic bags as far as possible.
- e. The kitchen waste bins should be small in size to avoid accumulation of wet waste and are to be frequently emptied.
- f. The medical center and labs waste are to be handled as per their own SOPs and are to be labelled accordingly.
- g. The medical center waste is classified as:
  - (1) Non-risk waste includes paper and cardboard, packaging, food waste, and aerosols and the likewise items. This type of waste may be disposed as per guidelines given above.
  - (2) Risk waste means infectious waste. This type of waste is to sealed with tape in bio degradable plastic bags before disposal.
- h. Waste storage containers, general housekeeping and the provision of adequate resources should be inspected daily by the respective departments.

- j. All workers handling wastes shall properly be trained on waste handling and use proper PPE.
- k. Waste of under construction buildings are to regularly cleared.
- l. The waste disposal activity normally involves cement and sand dust which is hazardous for health. Such waste is to be cleared after the campus has been closed or on weekends. In no case students are to be exposed to such environment.
- m. Use of asbestos in construction is prohibited.

6.15 **Developing Effective Material Management (from Raw to Waste).**

These points may be considered to reduce waste material production in campuses:

- a. Implementation electronic documentation at all campuses (OAS).
- b. Use of both sides of paper.
- c. Use of recycled paper (low quality) as and where required.

6.16 **Use of Polythene Shopping Bags.** The adverse effects of polythene shopping bags have much been debated in the recent past resulting in ban on their use. All BU campuses/CUs are to ensure that the subject restriction is observed. Alternates to shopping bags are to be encouraged for use.

6.17 **NOISE & AIR MANAGEMENT OPTIONS.** Components of Noise and Air Emissions Monitoring:

- a. **Monitoring of air and noise emissions.** This practice may initially be introduced using simple monitoring instrumentation like Noise level meter and Particulate matter monitoring (Both available with E&ES, BUIC). Other units of BU may take services of respective EPA or local consultants of the area in this regard.
- b. **Improving Noise Quality at Campus.** All campuses are to study the noise levels in and around the campus and suggest ways for improvement. The sampling may be done once in a year for regular monitoring. In-door noise levels are also to be included in the study. Services of E&ES department may be sought where required. E&ES departments shall be responsible for monitoring noise levels at all BU campuses.
- c. **Plantation.** There are a number of ways plants can reduce noise. One way is through sound absorption. Plant parts such as stems, leaves, branches, wood, etc. absorb sound. Rough bark and thick, fleshy leaves are particularly effective at absorbing sound due to their dynamic surface

area. Indoor/outdoor plantation be encouraged to achieve better noise levels. Plant Factors that affect sound absorption:

- (1) Number of plants (the more the better)
- (2) Size of the plant(s)
- (3) Surface area of the leaves and of the plants themselves.

d. **Pollution Control Technology Management.** An aspect that should cover the areas like construction sites and experimentation laboratories using noxious chemicals, dust and biological agents. For this, exhaust hoods, local exhaust ventilation system, scrubbers and other engineering controls may be employed.

e. **Development of Parametric Periodic Monitoring.** An annual or biannual monitoring of air parameters (PM, gases) may be conducted to evaluate compliance with standard/ chosen level of environmental quality.

6.18 **Reducing Environmental Foot – Prints.** This significantly important aspect needs to be covered by means of the following pragmatic options,

a. **Mass Transit.** All campuses/CUs are to provide means of mass transit and discouraging use of private vehicles.

b. **Renewable Energy.** All campuses are to work out the option of utilising solar energy not only to cut the cost but to minimize carbon emissions. The campuses be gradually shifted to the solar energy.

c. **Annual Environmental Audits.** Calculation of environmental foot prints, cost benefit analysis be conducted by E&ES department and EMP be revised accordingly. Annual environmental audits for and of BU units be conducted annually.

6.19 **Roles and Responsibilities.** Each campus/ CUs shall be responsible to formulate and implement their EMP. Help from E&ES department may be sought as and when required. Department of Earth and Environment Sciences (E&ES) shall be responsible to monitor the implementation. Besides, E&ES department at Islamabad campus shall be the sponsoring directorate for keeping the instructions contained in this chapter up to date.

6.20 **Director Quality Assurance.** All campuses are to forward environment data to BUHO as and when required. Director Quality Assurance at BUHO shall be responsible for obtaining Green Matrix certification from Environment Protection Agency (EPA) for all campuses.

**6.21 Director Campus/ CU HODs and Faculty member.**

- a. Implementation of BU HSE policy.
- b. Developing various plans and SOPs as per environment policy.
- c. Monitoring the implementation of environment policy parameters as environment policy.
- d. Resource management
- e. Providing sufficient funding for implementation and enforcement of Environment Policy.
- f. Designating authority and areas of responsibility to the local E&ES coordinator.

**6.22 Local Environment Coordinator.** The Heads of Department of Environment and Earth Sciences at Islamabad and Karachi are responsible for implementation of Environment Policy and act as consultant and coordinator on environmental issue of all campuses/CUs at these cities. Duties are as follows:

- a. Facilitating and monitoring local implementation of this policy.
- b. Providing technical assistance for the development and implementation of environment programs.
- c. Provide help to prepare environmental plans at various campuses/CUs.
- d. Monitoring the implementation of environment policy at various campuses/CUs spread over various locations in the city.
- e. Obtaining NOC from Environment Protection Authority (EPA) for each building/campus.

**6.23 Potable Water Testing.** The departments of E&ES at Karachi and Islamabad campuses shall be responsible for testing all potable water dispenser points at various BU campuses in the city through Senior Medical Officers of each campus. The labs at these departments are to be fully equipped to enable them to conduct water tests of all ranges. The Lahore Campus is to utilize local resources for testing of potable water.

## **CHAPTER 7**

### **HEALTH**

7.1 **Importance.** The health policy is decisions, plans, and actions undertaken to achieve specific health care goals within a society. Health care is a basic human need. Sickness is undesirable. It generates drag not only in one's own life but in the lives of his associates. It is even more essential for the students and staff of Bahria University; to stay healthy; because it reduces the chances of falling behind the class and missing curriculum targets. It can have an adverse effect not only on the students but on the family as well. The health policy for Bahria University is hereby formulated to provide a healthy environment at all campuses. Leading causes of preventable death worldwide include hypertension, smoking, malnutrition, sexually transmitted diseases, obesity, physical inactivity, alcohol, indoor air pollution, unsafe water, and poor sanitation.

7.2 **Objective.** The overall objective of Bahria University's Health Policy is to create the conditions required for achieving a safe and healthy environment at the campuses.

7.3 **Policy Framework.** The ensuing paragraphs give the framework required to achieve the objective. The policy charts out areas of responsibilities, the activities, infrastructure, and training required to achieve a healthy environment. The keyword to the success of this policy remains the active participation of all stakeholders

7.4 **Organisation.** At BUHO level, the Admin, Safety & Security Directorate shall implement the health safety policy and keep the contents up to date. At campus level the organisation of health safety shall work under Director Campus/ CU

#### **7.5 PREVENTION**

7.5.1 **Preventive Measures.** The preventive measures are the first and foremost steps taken to achieve the goal. If these measures are well taken, the efforts and costs required for a cure will decrease substantially.

7.5.2 **Administrative.** The role of campus administration in achieving a healthy environment cannot be overemphasized. The undermentioned preventive measures fall under the administrative domain of each campus/CUs:

7.5.3 **Precautions Against Spread of Communicable Diseases.** All the campuses/ CUs are to formulate and implement SOPs for prevention of

communicable diseases like CORVID – 19, dengue, etc. While doing so, the instructions of the Higher Education Commission (HEC) and other concerned government health agencies are to be followed. HEC guidelines on precautions against CORVID -19 is given at annex F and that of dengue fever is given at annex G to this policy respectively.

Some of the ways in which communicable diseases spread are by:

- a. Physical contact with an infected person, such as through touch (staphylococcus), sexual intercourse (gonorrhea, HIV), fecal/oral transmission (hepatitis A), or droplets (influenza, TB).
- b. Contact with a contaminated surface or object (Norwalk virus), food (salmonella, E. coli), blood (HIV, hepatitis B), or water (cholera).
- c. Bites from insects or animals capable of transmitting the disease (mosquito malaria and yellow fever; flea: plague)
- d. Travel through the air, such as tuberculosis or measles.

**7.5.4 Awareness through Lectures.** Lectures be planned and conducted specially for lower staff because their exposure to communicable diseases is more than other.

**7.5.5 Solid Waste Disposal.** The unclean environment very often is the source of the spread of diseases. The timely and efficient disposal of solid waste is a valuable contribution to preventing disease. Chapter 6 contains guidelines on the solid waste management plan. Each campus is to develop and implement its plan in light of these guidelines.

**7.5.6 Clamping the Source of Disease Spread.** Malaria and dengue are amongst the main dangers of stagnant water, which can become a breeding ground for the mosquitoes that transmit these diseases. Water stagnation for as little as six days can completely change bacterial community composition and increase cell count. The stagnant water is either to be cleared or sprayed with insecticide to prevent spread of diseases.

**7.5.7 Food Quality.** According to World Health Organisation (WHO) statistics, over 200 diseases are caused by eating food contaminated with bacteria, viruses, parasites or chemical substances such as heavy metals. The administration of each campus is to organize the inspection of food activity in the most judicious way to achieve high standards of health safety. Following is to be borne in mind while handling food at various stages at the campus:

- a. Foodborne diseases are caused by contamination of food and occur at any stage of the food production, delivery and consumption chain.
- b. Disease can result from several forms of environmental contamination including pollution in water, soil or air, as well as unsafe food storage and processing.
- c. Food borne diseases encompass a wide range of illnesses from diarrhea to cancers. Most present as gastrointestinal issues, though they can also produce neurological, gynecological and immunological symptoms. Diseases causing diarrhea are major problems in all countries of the world.

**7.5.8 Food Handlers.** Illnesses that can be passed on through food includes Hepatitis A and diarrhea. Food handlers have an overall responsibility for doing whatever is possible to make sure that they do not make food unsafe or unsuitable for human consumption. Food handlers also have specific responsibilities related to their health and hygiene.

**7.5.9 Provision of Food at Low Price.** Many of the students visiting sickbays at various campuses report low blood pressure and sugar. It has been observed that many students cannot afford expensive food items served at campus canteens/cafeterias. Provision of food items at low prices can significantly improve students' health issues.

**7.5.10 Testing of Potable Water.** Samples from all sources of potable water are to be regularly tested. Where discrepancies are observed, necessary measures are to be taken to ensure that safe drinking water is available at the campus. For testing of samples, labs at Earth and Environment Sciences are to be utilized.

**7.5.11 Hostel Management.** Check list on hostel hygiene is placed at annex H to this policy. The same is to be implemented for health safety of hostellers.

**7.5.12 Drugs.** Drugs are chemicals that affect the body and brain. Different drugs can have different effects. Some effects of drugs include health consequences that are long-lasting and permanent. They can even continue after a person has stopped taking the substance. Side effects of drug addiction may include:

- a. A weakened immune system, increasing the risk of illness and infection.

- b. Heart conditions ranging from abnormal heart rates to heart attacks and collapsed veins and blood vessel infections from injected drugs.
- c. Nausea and abdominal pain, which can also lead to changes in appetite and weight loss.
- d. Increased strain on the liver, which puts the person at risk of significant liver damage or liver failure.
- e. Seizures, stroke, mental confusion and brain damage.
- f. Lung diseases.
- g. Problems with memory, attention and decision-making, which make daily living more difficult.
- h. Global effects of drugs on the body, such as breast development in men and increases in body temperature, which can lead to other health problems.

**The most severe health consequence of drug abuse is death.**

**7.5.13 Drugs Free Campus.** All out efforts be made to achieve Bahria University campuses free of drugs.

**7.5.14 Healthy Sports Activities.** In students, sports inculcate a healthy lifestyle. Sports help in preventing obesity and in encouraging healthy eating habits. Young people involved in sports typically consume more fruits and vegetables, have less chance to be obese, and are more likely to become physically active adults. Regular sports and physical activity help prevent communicable and non-communicable diseases. Hence, sports are cost-effective methods to help improve the health of the general public in developed and developing countries. All campuses/CUs are to promote indoor and outdoor sports activities.

**7.5.15 Teenage Smoking.** Teenage Smoking is preventable through information campaigning. Worldwide, tobacco use causes more than 7 million deaths per year. If the pattern of smoking all over the globe doesn't change, more than 8 million people a year will die from diseases related to tobacco use by 2030. All campuses are to pay special attention to arrest this trend.

**7.5.16 Regular Check-ups.** It is recommended that adults and children visit their doctor for regular check-ups, even if they feel healthy, to perform disease screening, identify risk factors for disease, discuss tips for a healthy and balanced lifestyle, stay up to date with immunizations and boosters, and maintain a good

relationship with a healthcare provider. Common screening can be arranged for students and staff of Bahria University by arranging medical camps through teaching hospitals and philanthropic organisations.

**7.5.17 Good Personal Hygiene.** Good personal hygiene involves keeping all parts of the external body clean and healthy. It is important for maintaining both physical and mental health. In people with poor personal hygiene, the body provides an ideal environment for germs to grow, leaving it vulnerable to infection. Other conditions may be prevented or the risk minimized by practicing good personal hygiene. Some common examples are scabies, pubic lice, head lice, body lice, diarrhea, athlete's foot, ringworm, pinworms, swimmer's ear, hot tub rash etc. Guideline on better personal hygiene is given at annex J to this policy.

**7.5.18 Physical Activity and Nutrition.** In the current era, mostly people don't know about right choices of food. Physical inactivity and unlimited use of fast food are endangering our nation and especially youth /young generation and are more frequently suffering in metabolic and heart related diseases. In this regard, Medical Centers are to frequently arrange free medical camp for university employees and students in which height, weight, BMI, blood pressure and sugar check test with medical officer consultation over general health issues.

**7.5.19 Obesity/Overweight.** Our new generation especially and majority of us living a sedentary life style with eating habits of mostly high calorie fast foods in daily routine which is creating more health related issues or metabolic disorders like Diabetes, obesity, heart diseases etc. Regular interaction with students is therefore required to make them aware about food, diet, nutrition and obesity.

**7.5.20 Controlling Heart Disease.** Hypertension is one of the most common problem found in young generation due to unhealthy life style and food habits. Medical Care Center tries to spread knowledge among university employees and students through health

## **7.6 CURE**

**7.6.1 Campus Health Safety Organisation.** All Bahria University Sickbays are to offer standard health care facilities available in the respective premises, which includes first aid/emergency medical assistance to all students, faculty members & staff. In this regard, proper setup of medical care with necessary equipment, medicines & ambulance be ensured in all BU Campuses along with qualified Medical Officer and paramedical staff. SMO of sickbay should preferably be qualified in Family Medicine (Having good judgment acumen and emergency handling), which may be employed through the civil sector.

Following Health Care services are to be offered/ensured:

**7.6.2 Essentials of Health Care Services at Campus Sickbay.**

- a. General Medicine/surgical consultation and treatment in emergency cases only.
- b. First aid management (medical / surgical).
- c. Nebulization.
- d. Random blood sugar testing with glucometer.
- e. Dressing / stitching minor cut wound stitched / ensuring homeostasis in case of bleeding from nose / deep wounds.
- f. Stabilizing emergency patients and urgent evacuation to nearby hospitals for further treatment
- g. Patient counselling
- h. Faculty and staff sick leave assessment and process for approval by higher authority.
- j. Facilitate faculty and staff for their health related issues, hospital admissions, specialist referral and counselling.
- k. Facilitate health insurance officer.
- l. All CUs to provide emergency medication (pharmacy services) to all reporting patients in emergency as advised by Medical Officer.
- m. All CUs to arrange standardized well equipped ambulance along with the driver.
- n. Students, faculty members and employees can consult medical staff to seek any routine medical advice but patient will procure medicines from own resources.
- p. In case of emergencies, DD (A&C) is to facilitate & provide manpower to sickbay for taking patients to hospital.

**7.6.3 Training.** Director Campuses are to formulate and quarterly schedule the lectures/ demonstrations on general hygiene, personal hygiene, medical safety, First Aid and other current medical issues, by the SMO in their respective campuses.

**7.6.4 Sickbay Staff:** Each sickbay of the BU Campuses should have the appropriate medical staff as per local requirement. As general principle, following

staff should be available in the Medical Center. Their duties and responsibilities are elaborated at Annex K:

S No.	Designation	No	Remarks
a.	SMO	01	MBBS/Family Medicine qualified medical practitioner
b.	In-charge Sickbay	01	Chief/PO Med (Retd) - Ex-Naval Person (Less BULC)
c.	Medical Technician	01	LMT/MT-1 (Retd)
d.	Aya/Nurse	01	
e.	N/Qasid	01	

**7.6.5 Medical Stores and Equipment.** To have good medicines and surgical instruments, quotations shall be invited from Pharmacies on a yearly Rate Running Contract basis through advertisement in the News Papers. The vendor who offers maximum rebate shall be accorded the yearly contract with the approval of the Director-General Campus. Procurement Officer has to undertake the said process. All the medicines purchased shall be taken on charge by the Medical Officer. Medicines be purchased as per ceilings mentioned in Bahria University Statutes. Approvals shall be obtained on file by the Medical Officer. Monthly return of all medicines procured and issued be rendered to Director Campus by the Medical Officer.

**7.6.6 Ambulance.** The sickbay of the campuses are required to have a well-equipped ambulance and medical equipment / other miscellaneous items.

**7.6.7 SICKBAY – SOPs:** Undermentioned SOPs/Guidelines for sick bay are attached as Annex L:

- a. SOPs for sickbay reception (Patient focused).
- b. SOPs for sickbay staff dealing with the patients.
- c. SOPs for Patients treatment/dealing during working hours.
- d. SOPs for Triage of patient in mass casualties or any disaster situation.

- e. SOPs for Intravenous and intramuscular injections.
- f. SOPs for Brought in dead.
- g. SOPs for Patients treatment/dealing during non-working hours.
- h. SOPs for ambulance handling.

## **CHAPTER 8**

### **MENTAL HEALTH POLICY**

**8.1 Mental Health.** Mental health is an integral part of any individual's functioning. It includes emotional, psychological, and social well-being. Mental health affects how we think, feel, and act and helps determine how we handle stress, relate to others, and make choices. University life can represent a key transitional period and important milestone for many students. It brings with it several new and exciting experiences that can sometimes be challenging, and complex.

Bahria University commits to provide care to all its students, staff, and faculty and aims to promote positive mental health and wellbeing. In line with this idea, BU has a safe, non-judgmental and supportive environment for all students, staff and faculty.

**8.2 Definition of Mental Health Difficulties.** Mental health, as defined by the World Health Organization (2014), is “a state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community”. The primary focus of this document is those students, staff and faculty who may experience mental health difficulties in the course of their affiliation with BU. This term ‘mental health difficulty’ is used for the purpose of this document to describe students, staff and faculty who experience:

- a. A temporary, but difficult response to stress or external pressures, a painful event, physical illness or symptoms of substance use etc. This response is likely to affect other areas of the individual's life.
- b. A long-term mental health condition which may have a significant impact on their day-to-day life.

**8.3 Key Points.** BU is committed to support any student, staff and faculty experiencing mental health difficulties. However, as they are adults who have responsibility for their own actions and choices, the student, staff and faculty have the right to decline any support offered or to act upon any advice given. Three key points may be particularly helpful when supporting students, staff, and faculty with mental health difficulties:

- a. While listening to someone sharing their mental health difficulty, it is good practice to be empathic and respect the information provided by the individual to describe their mental health difficulty.
- b. People with mental health difficulties have the same rights and responsibilities as other people.
- c. Those with a significant and long-term mental health difficulty fall within the definition of disability. These students, staff, and faculty may require reasonable adjustments to allow fair and equal participation in their

learning.

**8.4 Purpose of the Policy.** To support the mental health of students, staff and faculty, BU mental health policy aims to:

- a. Provide a clear framework which shall ensure a consistent approach towards students, staff and faculty and their mental health needs.
- b. Outline the support available to students, staff and faculty within the university regarding mental health.

**8.5 Scope and Limitations.** This policy covers all students, staff and faculty and addresses their mental health needs and outlines the protocol to be followed in this regard. The university's mental health facilities offer counseling, psychotherapy, assessment, and crisis services.

**8.6 Support Available to Students (Umeed-e-Nau and Wellbeing Center).** Umeed-e-Nau (BUKC) and Wellbeing Center (BUIC) provide counseling and psychotherapy services for a wide range of mental health difficulties and conditions. These services are both preventive and curative in scope and are confidential. They are offered face-to-face or via online means on one-to-one as well as group basis.

## **8.7 RECOGNIZING MENTAL HEALTH DIFFICULTIES**

**8.7.1 Possible Indicators of Mental Health Difficulties.** Everyone's experience of a mental health difficulty may be unique and different. Therefore, the signs and indicators for individuals experiencing a mental health difficulty vary.

**8.7.2 General Signs to Look Out.** The indicators below do not directly mean that the student, staff and faculty have a mental health difficulty. The indicators are only placed as reference to start a dialogue with the student, staff and faculty to understand the issue. This will allow the concerned authorities to offer support and take appropriate actions. Some general signs to look out for may include:

<b>Behavior Changes</b>	<b>Cognitive Changes</b>	<b>Physical Changes</b>
Withdrawal	Lack of concentration	Panic attacks
Changes in attendance	Mood swings	Noticeable weight gain/loss
Deterioration in academic Performance	Loss of Confidence	Low energy
Acting out of character	Irritability	Decline in personal hygiene
Incongruent responses to situations	Feeling overwhelmed	Sleep disturbances

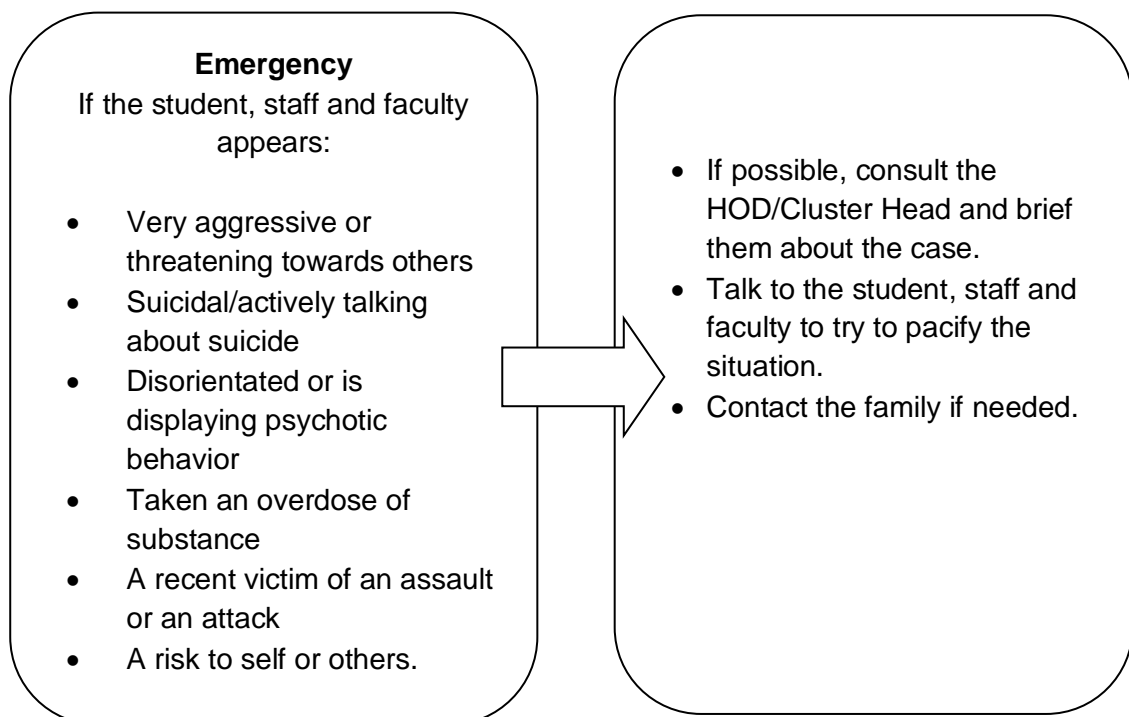

Any individual who is concerned about the mental health of a student, staff and faculty shall contact the respective authority/HOD/Cluster Head/Class Advisor/Clinical In-charge of mental health services for advice. This conversation does not necessarily require the student staff and faculty's identity to be disclosed.

## 8.8 **TAKING ACTIONS**

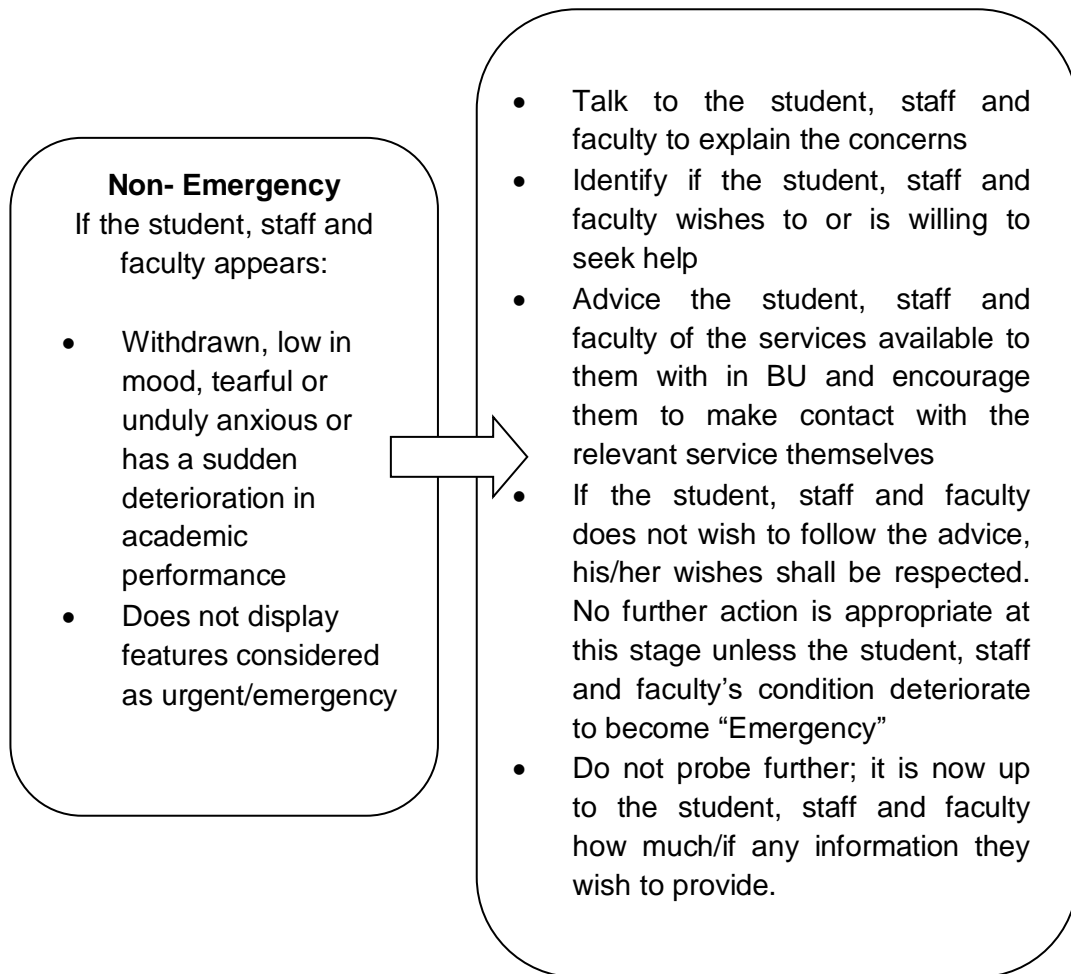

8.8.1 **The Role of BU Faculty and Staff in Taking Action.** Not everyone who experiences a mental health difficulty poses a risk to themselves or others. However, on occasion, a student may require urgent or emergency attention due to threats of harm to themselves or others.

8.8.2 **Emergency vs Non-Emergency.** If any faculty and staff become concerned about a student, staff and faculty's mental health, there are two pathways that shall be taken:

a. **Emergency:** If it **is** an emergency following actions shall be taken:

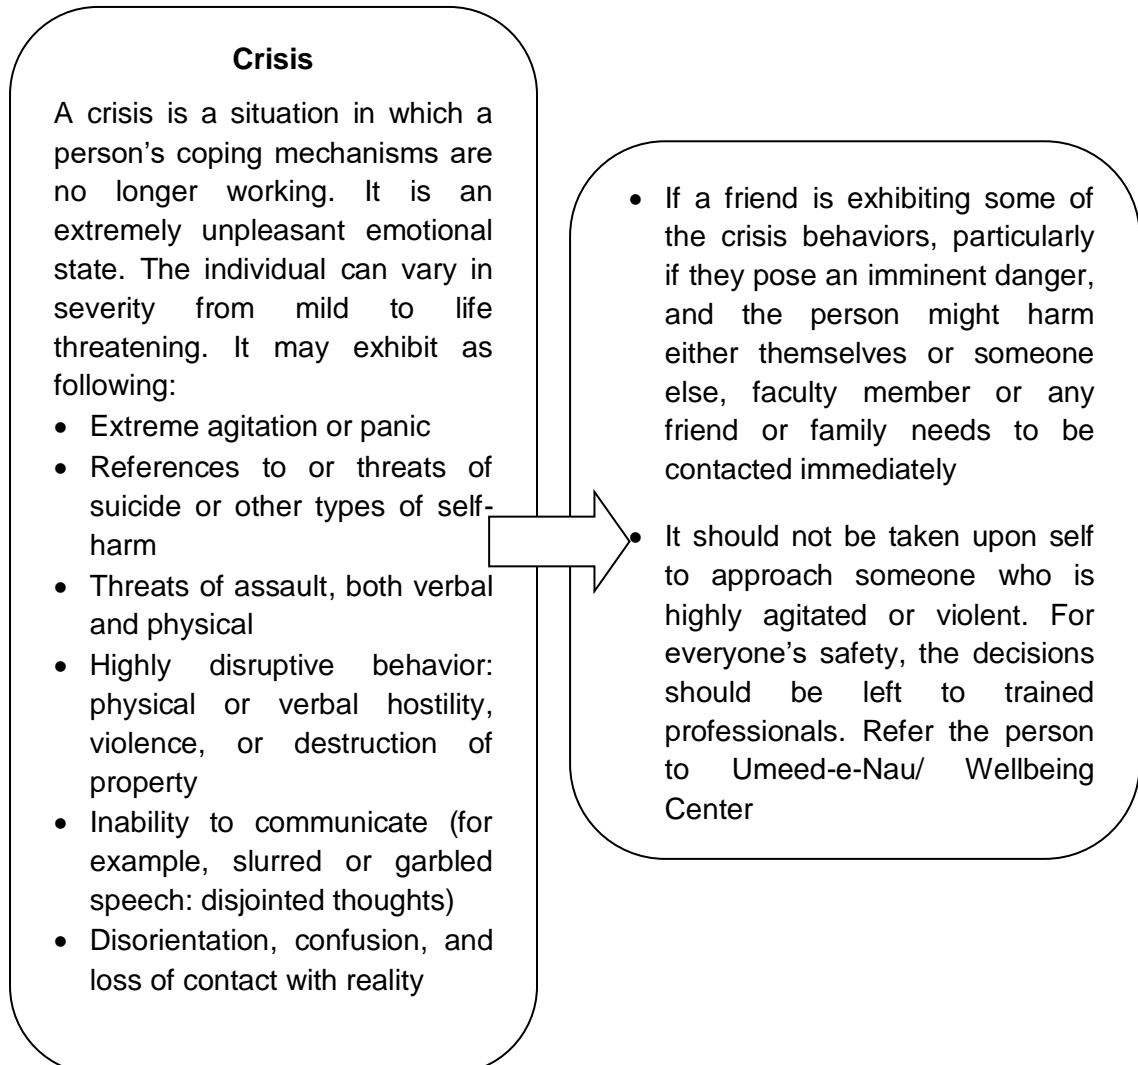

b. **Non-Emergency**: If it is **NOT** an emergency following actions shall be taken:

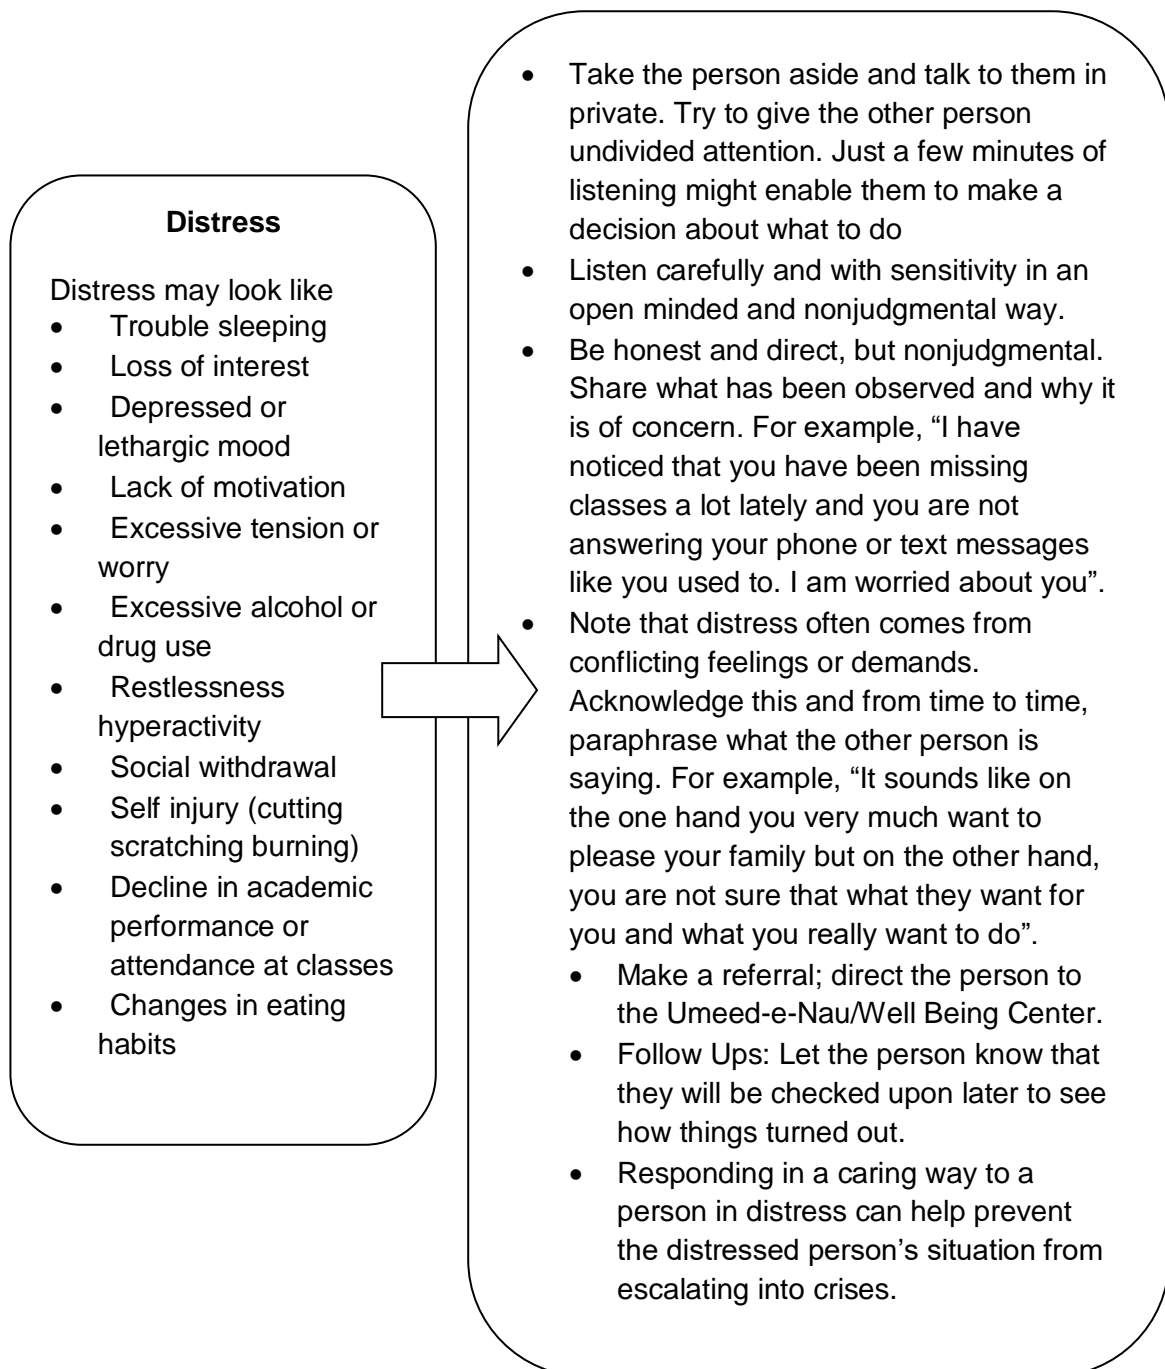

8.8.3 **The Role of Students.** Any student who is concerned about another student's mental health is encouraged to read and follow the actions outlined in the flowchart below. There are two pathways that shall be taken:

- a. **Crisis:** If it **is** a crisis, following actions shall be taken:

b. **Distress:** If it is not a crisis, but someone is distressed, following actions shall be taken:

8.8.4 **Out of Hours.** If a crisis is identified out of hours, then normal routes of referral shall be followed as appropriate. In the first instance, relevant faculty/ class advisor or HOD shall be informed so that they may provide appropriate guidance and shall refer the case to Umeed-e-Nau/Well-Being Center.

8.9 **Return to Study.** Following a period of absence from the BU for the purposes of recuperation due to a mental health difficulty, the student, staff and faculty shall be supported to resume their responsibilities.

If a student, staff and faculty indicates that within the past week, they have attended a crisis mental health assessment and were not admitted to hospital or if a student, staff and faculty indicates to any member of BU that they have recently (within 1 month approximately) returned from a hospital stay (voluntary or involuntary) due to mental health difficulty, it is required to provide the student, staff and faculty with contact details of the Umeed-e-Nau/Wellbeing Center and to also inform Umeed-e-Nau/Wellbeing Center.

8.10 **Data Maintenance and Confidentiality.** Information/data of all students, staff and faculty opting for mental health services shall be maintained by Clinical Incharges of Umeed-e-Nau and Well-Being Center. Case details shall only be shared with relevant authorities on need basis while ensuring maintenance of confidentiality.

8.11 **Data Linkage with Medical Center.** At times, the students, staff, and faculty do not opt for the mental health services directly. Rather, they go to the medical office with apparent medical complaints. In case it is suspected or confirmed that any student, staff, and faculty coming to the medical office has a possible mental health difficulty, the Medical Officer shall contact the Clinical Incharge Umeed-e-Nau/Well-Being Center to share the information.

8.12 **Data Analysis.** Data analysis of all the BU students, staff, and faculty cases handled at Umeed-e-Nau and Well-Being Center shall be done on annual basis by respective Clinical Incharge to identify factors leading to mental health difficulties. Based on the annual analysis, preventive and curative measures may be suggested to the concerned authorities.

**Annex B to**  
**Safety Policy**

**Safety Check Lists**

<b>Safety Check-off list</b>		
<b>Important</b>		<b>No Inflammable material is to be placed in the office spaces</b>
		<b>No slip, trip and fall situation should exist in the entire area of responsibility</b>
		<b>No smoking be enforced in the entire building except designated space</b>
<b>Items</b>		<b>Instructions</b>
<b>Building</b>	Building In charge	Building in charge shall be responsible for safety of the building
	Grills	All windows on first floor and above are to be installed with grills?
	General Appearance	Should be well maintained. No cracks should be visible in or outside the building
	Lighting	The building should be well lit in the outside surrounding area at night. Motion detector lights are recommended
	Walkway obstructions	The walkways should be free of obstructions, pointed objects, slip trip and head hitting obstacles
	Tripping hazard	Carpets, rugs, mats etc. do not present trip hazard
	Water leakages	Water leakages in the roof and walls should be tested during rain and repaired accordingly
	Building structure	Floors, walls, ceilings, rooftops, pipework etc. are in good condition & free from dirt/dust/rust
	Rooftops	Should be clean and free from rain water pooling, vegetation, cracks etc.
	Fire Hazards	Look for fire hazards inside and in immediate vicinity of the building
	Seepage	No seepage in the building should be ensured
<b>Electrical</b>	Electrical Wiring	Wires and electrical fittings should not be loose, exposed or worn out
	Knowledge	Everyone should know the location of main distribution box/boxes to be switched in an emergency situation
	Overloading	Make sure the electrical load is not too much for the circuit

	Unplug appliances	Unplug appliances when not in use to save energy and minimize the risk of shock and fire.
	Extension wires	Make sure the extension wires are in good condition and are not overloaded
		Use of extension wires should be minimized. Proper covered wiring should be rigged when requirement is of permanent nature
		Do not run extension wires through high-traffic areas, under carpets or across doorways or where chairs can roll over them
		Keep extension wires close to a wall to avoid trip hazards
	Lightening arrestors	Should be checked for continuity, earthing and resistance. Record to be maintained by building incharge
	Electrical fittings	Only approved electrical items be installed
	Tripping of Circuit Breaker	If the circuit breaker trips, immediately check the cause. In case it trips again and again then report the matter to the concerned authority
	LT Panel Room	Distribution panel room should be kept locked when not in use
		Distribution panel room should not be used as store
	Unusual Noise	If an equipment or machine is making unusual sounds, emitting smoke or sparks, or the surface feels abnormally hot, do not ignore the signs and report the matter immediately
	Transformer Maintenance	Keep the breathing holes in the silica gel breather clean to ensure proper breathing action at all times.
		If your electrical transformer has oil filling bushing, make sure that the oil is filled up to the correct level.
		Replace the silica gel, where applicable, if its color changes to pink.
		Report any leakage in the transformer as soon as it is detected.
<b>Office</b>	Office in charge	Senior most occupying the office shall be responsible for the safety of the office space
	Office equipment	As per authorization
	Inventory control	List of items authorized for the office be displayed

	Cabinets and shelves	No irrelevant materials, documents, drawings, etc. are placed
	Passages	Walk passages in the office should not be obstructed
	Air passage	All office spaces are to be well ventilated
	Visibility	No place in the entire building should provide hideout
	Lightening	All office spaces should be well lit
	Exposed Flame	No exposed flame (like in some gas heaters) be allowed
	Hangings and displays	Only authorized items are displayed. Religious, political recreational etc. material should not be displayed
	Cabinets and shelves	Not overloaded with stuff
	Desks and tables	No irrelevant materials, documents, drawings, etc. are placed
	Drawers	No excess pieces of equipment, documents, etc.
	Storage area	Storage area is defined
	Stowage	Nothing should be stowed under the tables, benches and over the cupboards
	Standards for disposal	Standards for eliminating unnecessary items and record should exist and followed
	Classified record sorting	Space marked for classified record with lock and key
	Tools and equipment	Locations of tools and equipment are clear and well organized
	Labeling	Labels to indicate locations, containers, boxes, shelves & stored items
	Racks and cabinets	Racks, cabinets and shelves are kept clean
	Machines and tools	Machines, equipment and tools are kept clean
	Stored items	Stored items, materials and products labelled and kept clean
	Lighting	Lighting is enough and all lighting is free from dust
	Ventilation	Good movement of air exists through the room (limits the spread of viruses)
	Pest control	Pest control exists and effective

	Cleaning tools	Cleaning tools and materials are easily accessible
	Cleaning responsibilities	Cleaning assignments are defined and are being followed
<b>Firefighting</b>	General condition	Fire extinguishers should be checked for cleanliness, labeling, visibility, safety seal
	Tagging	Fire extinguishers are tagged with the last date of inspection (not more than 12 months)
	Knowledge of firefighting equipment	All personnel working in the office should have up to date knowledge of safety equipment
	Fire protection system	Detection, alarm, sprinkler, pump and hose subsystems is tested periodically
	Training & Exercise	Date of last firefighting and emergency evacuation exercise be displayed at the entrance door
	Heaters	Portable, electric heaters are not operated within 3 feet (91.4 cm) of any combustible materials
	Fire Connections	The firefighting connections are visible and accessible
		Couplings or swivels are not damaged and rotate smoothly

## PART II

### RIGHTS OF PERSONS WITH DISABILITIES

**3. Equality and non-discrimination of persons with disability.** - (1) The government shall ensure that every person with disability shall have a right to be respected for his individual

dignity and lead a decent life with equal opportunity to participate in educational, social, economic, cultural and all other activities in the society without any discrimination.

(2) No person or institution, whether public or private, shall discriminate against persons with disabilities or violate their rights or restrict benefits in any manner.

(3) The government shall take all necessary legal and administrative steps including appropriate changes in the existing laws, to ensure that every person with disabilities enjoy a life inclusive of the right of equality guaranteed under the Constitution and that such person's disability shall not be used by any person or institution to restrain or restrict him from enjoying his rights unless there is a reasonable cause that not restricting such person may cause him harm or letting him perform something may be out of his physical or mental capacity.

(4) In view of restricted access of the persons with disabilities to means of earning their livelihood independently, the government shall take extraordinary steps to ensure their effective inclusiveness in the society through suitable education, skill development, training and placement against appropriate positions in the government departments and entities in the private sector according to the allocated quota.

(5) No person with disability shall be a subject of any research without his willingness or consent without any pressure and such research shall be through using accessible modes, means and formats of communication.

**4. Equality before law.** - (1) The government shall ensure that the persons with disabilities are treated equally like persons without such disabilities and that they are not discriminated in exercise of their rights.

(2) It shall be ensured that such persons have legal capacity to enjoy their rights and if they need support to exercise legal capacity such support is provided to them free of cost.

**5. Right to privacy.** - (1) Every person with disabilities shall have right to privacy as available to all citizens regardless of his living in a private home, rehabilitation centre, hostel or any private or public accommodation.

(2) No person with disabilities regardless of place of residence or living arrangements shall be subjected to arbitrary or unlawful interference with his privacy of person, family, home and communication or correspondence. Such persons shall have the right to the protection of the law against any illegal interference and attack against their person, family, property and reputation.

**6. Women, children, elderly people and transgender with disabilities.** (1) In view of the extraordinary vulnerability of women, children, senior citizens and transgender with disabilities, the government shall in prescribed manner take special measures to ensure that such women, children, senior citizens and transgenders with disabilities are given full protection under law in enjoying their rights.

(2) The government as well as the private sector shall in the prescribed manners take necessary measures to ensure development, advancement and empowerment of women, children, senior citizens and transgender with disabilities.

**7. Ease of access and mobility.** - (1) The government as well as the private sector shall take necessary measures towards allowing ease of access to the persons with disabilities to public buildings, hospitals, recreational facilities, public transport, streets and roads for which the old buildings and vehicles shall be appropriately modified and new buildings and vehicles shall be built conforming to appropriate standards in conformity with guidelines developed by the Council:

Provided that the government shall ensure accessible washrooms, toilets and bathrooms with all the facilities and necessary accessories.

(2) The Council shall develop a guideline on removing barriers and obstacles to access in buildings, roads, mode of transportation, housing, hospitals, schools, workplaces, communication and information related services, recreational spaces, parks and also public washrooms and get those implemented by the concerned authorities and persons both to public and private sectors.

(3) The Council shall develop a set of minimum standards and scope of access and related signage that each department, authority, entity and major enterprise shall put in place to ensure necessary access of persons with disabilities.

(4) The government shall implement policies and programs to promote the personal mobility of persons with disabilities at affordable cost or free.

(5) The government shall ensure special seats in all means of transport for persons with disabilities and allot parking space exclusively for persons with disabilities at all public and private places.

(6) The Council shall develop and enforce guidelines allowing persons with disabilities to have full and appropriate access to all forms of mass communication including information technology to enjoy freedom of speech and freedom of information. A national relay system may be established to standardize mechanism understandable consistently across the country.

**8. Protection from abusive, violent and intolerant discriminatory behavior.**- (1) The government shall take all possible steps to protect persons with disabilities from all forms of abuse, violence and exploitation at the hands of any person, institution or authority.

(2) Whenever an act of abuse, violence and intolerant discriminatory behavior is committed against any person with disability and the information of such act is communicated to the Council or any law enforcement agency, the concerned agency on receipt of such information shall immediately take necessary action to investigate and curb such act and to take appropriate measures under law to lodge the victim of abuse, violence or intolerance, to a safe place for protected housing. NC' cost shall be recovered from such victim for lodging in safe place in such situation.

(3) Notwithstanding the provisions of any law for the time being in force, an act of physical violence against a person with disability causing even a minor injury shall be deemed as grievous injury and shall be treated as an act of violence under section 335 of the Pakistan Penal Code, 1860 (Act XLV of 1860) and shall attract punishment accordingly. Other situation of aggravated abuse and violence shall also be deemed to have more gravity than in case of a person without disabilities.

(4) In case of need for legal aid such aid shall be made available to such affected person at public expense or prevent its occurrence, as the case may be, or pass such order as deemed fit for the protection of such person with disability.

**9. Equity in education.** - (1) The government shall take all necessary measures to ensure that persons with disabilities are afforded equal rights to access government as well as private educational institutions and shall be provided with appropriate facilities for their education without any discrimination.

(2) The government shall provide free pre-primary to higher education to persons with disabilities.

(3) The government shall take necessary measures to establish special educational institutions for persons with moderate to severe disabilities to cater to their special needs, in addition to making other institutions reasonably equipped and staffed to provide appropriate facilities for inclusive education to such persons in those general educational institutions. .

(4) Persons with disabilities shall not be denied admission into any educational institution, whether state owned or private, on ground of their disabilities.

(5) It shall be illegal for an institution and its staff members to discriminate against or abuse or otherwise violate rights of a person with disability at his place of education for which both the institution and such violating person shall be punished.

(6) The government shall ensure inclusive education focusing on personality, development, creativity and strengthening of physical and mental capabilities of persons with disabilities.

(7) Reasonable and appropriate accommodation shall be provided to persons with disabilities in educational institutions including hostels, where applicable.

(8) The government shall establish adequate dedicated and general facilities for teacher training with a view to train adequate number of specially trained teachers equipped with - skills to teach students with various disabilities.

(9) The government shall ensure that all persons with disabilities are given full . access to all modes and means of education including but not limited to vocational training, online education distance learning and adult education.

(h)	One representative from the Division allocated with the business of poverty alleviation and social safety not below the rank of Joint Secretary;	Member
(i)	An officer not below the rank of a Joint Secretary of the Division to which business of this Act stands allocated;	Member
(j)	Chairman, Capital Development Authority (CDA);	Member
(k)	Chief Executive or Head of National Institute of Rehabilitation Medicine (NIRM)	Member
(l)	Three persons with disability	Member

(2) Member at clause (i) of sub-section (1) shall also act as Secretary of the Council.

(3) The Council may co-opt any person as a member.

(4) The government functionaries represented in the Council shall hold their memberships on ex officio basis. The tenure of the members shall be three years.

(5) The Council shall meet at-least quarterly and the quorum of each meeting shall be one-fourth of the total number of the composition of the Council.

**2. Functions of the Council.** - (1) The Council shall have the responsibility to achieve and implement objectives of this Act and to assist the government in developing legal and institutional frame work.

(2) The Council shall be the executive authority to implement this Act, to develop a legal and social environment and to help persons with disabilities to have the protection of law in enjoying their fundamental rights.

(3) The Council shall, with the help of other authorities and persons, take all possible measures to protect persons with disabilities from discrimination, exploitation, torture, inhuman or degrading treatment on the hands of any one including their families and caregivers.

(4) The Council shall coordinate implementation of the principles of relevant convention at provincial and lower administrative levels through providing technical assistance to various organs of the provincial legislatures and governments in developing appropriate legal and institutional frameworks in their jurisdictions and making them achieve the objective of protection and enforcement of rights.

(5) The Council shall evaluate the effectiveness of laws and policies and assess the implementation of laws and policies at the national level and recommend to the government any changes required in the policies, laws and practices.

(6) The Council shall conduct or cause to conduct research on the status of persons with disabilities and matters related to the promotion and protection of their rights.

(7) The Council shall put into place an institutional mechanism to regularly monitor performance of various departments and organizations in the government and issue a performance score card to each such entity and organization at least once in every three years. Similarly, the Council shall devise and maintain score cards for private entities that seek such evaluation and assessment. Such performance audits shall be conducted by third party professionals and the employees of the Council.

(8) The Council shall assess its own performance in creating legal and social environment in the country and issue an annual status report at the end of every calendar year to present its report to the Parliament through Minister-in-charge.

(9) The Council shall be responsible to monitor the activities of private and community based organizations to ensure that required standards of service are maintained. The Council may enforce an institutional mechanism for effective, efficacious and transparent functions of such organizations and may impose restrictions on organizations not meeting the objective criteria laid down by it.

(10) The Council shall have the powers to address individual and collective complaints of violations of human rights of persons with disabilities.

**23. Registration of persons with disabilities.** - (1) Any person with disability desirous of being employed or otherwise rehabilitated may have his name registered in the register maintained by the Council or its designated office in such form and in such manner as may be prescribed by the Council.

(2) The Council shall, if it thinks necessary, cause each person with disability registered under sub-section (1) to be assessed as to the nature of his functional disability and also as to his aptitude and the nature of work he is fit to do by a medical officer authorized by it or by such assessing board as it may appoint having at least one medical officer and the medical officer or, as the case may be, the assessing board shall submit its report to the Council in such form as may be prescribed by the Council.

(3) If the person with disability is considered by the Council fit to work, he shall be informed indicating the nature of work for which he may be employed or the trade or vocation in which he may be trained and an endorsement to that effect shall be made against his name in the register.

(4) If the person with disability is not considered by the Council fit to work, he shall be informed accordingly for an endorsement to that effect being made against his name in the register and the Council shall take such measures for his rehabilitation as it thinks fit.

(5) If a person is declared by the Council not to be a disabled person, his name shall be struck off from the register.

**24. Establishments to employ persons with disabilities.**- (1) Not less than one percent of the total number of persons employed by an establishment at any time shall be persons whose names have been registered with the Council or its designated office of the area in which such establishment is located and against whose names in the register maintained under section 23 an endorsement exists to the effect that they are fit to work.

(2) The persons with disabilities employed against any post in pursuance of sub-section (1) shall be entitled to the terms and conditions which are not less favorable than those of the other persons employed by the establishment against similar posts.

(3) When calculating the percentage of the posts in an establishment for the purposes of employment of persons with disabilities, the fraction of 0.5 and above shall count as a whole number.

**25. Establishment to pay to the Fund.** - An establishment which does not employ a person with disability as required by section 24 shall pay into the Fund each month the sum of money it would have paid as salary or wages to a disabled person had he been employed..

**26. Dissolution of the Council.**- On the commencement of this Act, the council formed under the Disabled Persons (Employment and Rehabilitation) Ordinance, 1981 (XL of 1981) shall stand dissolved and on such dissolution all assets, rights, powers, authorities and privileges and property, movable and immovable, cash and bank balance, reserve funds, investments and all other interests and rights in, or arising out of such property and all debts, liabilities and obligations of whatever kind of the dissolved council subsisting immediately before its dissolution shall stand transferred to and vest in the Council.

**27. Governmental authorities and other persons to assist the Council.**- (1) All the functionaries of the government shall extend full and effective cooperation to the Council in ensuring the enforcement of this Act and other laws for protecting the rights of the persons with disabilities.

(2) Any person in the governmental position not effectively cooperating with the Council shall be deemed to have committed misconduct and shall be proceeded against accordingly.

**28. Funds for rehabilitation.**- (1) The government may establish non-lapsable endowment fund for sustainably financing projects and activities related to ensuring effective rights protection and inclusion in society of persons with disabilities.

(2) The Fund established under sub-section (1) shall be called as ICT Disability Fund which shall be managed by the Council.

(3) The following shall be the sources of the Fund, namely: -

- (a) Annual allocation and grants of funds from Federal Government;
- (b) grants from international organizations, governments and other such bodies;
- (c) levies and other charges that government imposes for rehabilitation;
- (d) fines and penalties under this Act;

- (e) donations and bequests by private persons; and
- (f) any other source.

(4) Fund established under the Disabled Persons (Employment and Rehabilitation of Ordinance) 1981 (XI, Of 1981) shall stand transferred along with all sums and moneys to the Fund established under sub-section (2).

29. **Creating public awareness.** - (1) The Council shall take immediate, appropriate and result oriented measures to raise awareness amongst the society as whole with regards to recognition and respect for persons with disabilities and their rights.

(2) The Council shall recommend to the Federal and Provincial Governments , measures to include topics on disability in educational curriculum and to create awareness among young students about persons with disabilities.

(3) The government shall include topics on addressing problems of persons with disabilities in training programs of institutions responsible for imparting trainings to officers and officials of the government, including judges and court officials.

30. **Rehabilitation.** - (1) The government shall take all possible measures to ensure that persons with disabilities attain maximum independence and ability to participate in activities of life including getting education, doing business, getting employed and participating in sports and cultural activities.

(2) The government shall promote continuing skill development and training in existing advance skills and technologies to persons with disabilities for effective participation and integration in the community.

(3) The government shall undertake initiatives to promote, support and implement community based rehabilitation and research initiatives of its own.

31. **Insurance cover.** - (1) the Council may devise and put in place comprehensive group medical and accident insurance for persons with disabilities and may also facilitate such persons in getting affordable life and other forms of insurance.

(2) The Council may pay the premium for persons with disabilities who cannot pay the premium from their own sources.

32. **Special disability courts.** - (1) For speedy justice, the government may designate and may encourage provincial governments to designate, courts to hear cases under this Act or other laws in which one or more parties are persons with disabilities.

(2) There shall be an effective institutionalized mechanism to monitor cases in courts under sub-section (1) by appropriate judicial forums as devised by the respective High Court. .

33. **Power to make rules.**- (1) The Council may, in consultation with the Federal Government and by notification in the official Gazette, make rules to carry out purposes of this Act..

(2) The rules made under the Disabled Persons (Employment and Rehabilitation) Ordinance, 1981 (XL of 1981) so far as they are not inconsistent with the provisions of this Act shall continue to be in force until altered, amended or repealed.

34. **Power to make regulation.** - The Council may, by notification in the official Gazette, make regulations for its own efficient and professional working and for effective achievement of objectives of this Act.

## **PART IV**

### **MISCELLANEOUS**

35. **Removal of difficulties.** - If any difficulty arises in giving effect to any of the provisions of this Act, the Federal Government may make such order, not inconsistent with the provisions of this Act, as may appear to be necessary for the purpose of removing the difficulty.

36. **Repeal.** - The Disabled Persons (Employment and Rehabilitation) Ordinance, 1981 (XL of 1981) is, to the extent of Islamabad Capital Territory, hereby repealed.

---

### **Statement of Objects and Reasons**

The Constitution of Islamic Republic of Pakistan guarantees the Fundamental Rights of all citizens, including Persons with Disabilities, without discrimination. As State Party 110 the UN Convention on the Rights of Persons with Disabilities (UNCRPD), Pakistan is obliged to ensure and promote the full realization of rights and freedoms for persons with disabilities by taking appropriate legislative, administrative and policy measures. Keeping in view our national and international commitments, the ICT Rights of Persons with Disability Bill, 2018 has been prepared through a consultative process for protection and promotion of Rights of PWDs. The law proposes legal and institutional framework for an inclusive society where PWDs have full participation in all forms of social life, particularly in health, education and employment.

2. The Bill seeks to achieve the aforesaid objective.

Dr. Shireen M. Mazari  
Minister for Human Rights

**Guidelines for Calculating the Number of Firefighters**

1. Consider the following factors when calculating number of firefighters, you need:
  - a. **The number of Buildings and Floors.** You need at least one fire fighter for each floor in every building. Two is preferred so that sickness and holidays are covered.
  - b. **Number of Occupants.** You need enough fire fighters to guide everyone out safely to the designated area. The higher the risk of the workplace, the more fire fighters you will need to cover people. Low risk = 1 per 50. Medium risk = 1 per 20. High risk = 1 per 15.
  - c. **The Types of Occupants.** Those at greater risk include the elderly, children, pregnant women, people with disabilities, etc. additional fire fighters are needed where high risk occupants are present.
  - d. **The Number of Shifts.** For evening classes more firefighters are required. Evening classes should be organised in such a way that a sufficient number of firefighters are always present.
  - e. **Types of Workplace.** The first and foremost determining factor is the level of risk. Following should be considered:
    - (1) **The Quantity of Combustibles and Flammables Present.** For example, a chemical/high voltage electric distributions panels/machines like AC plants etc. would be higher risk than an office.
    - (2) **Sources of ignition.** Workplaces that have naked flames, electricity, and other sources of ignition present in the building or their use as part of work activities, e.g. restaurants and workshops, are higher risk areas.
    - (3) **The Fabric of the Building.** Those built with brick and stone are more resistant than some of the materials used in modern buildings.
    - (4) **The Nature of People's Work.** Certain work activities might slow down people's evacuation of the building, such as working with vehicles or machinery that must be turned off.

Furthermore, tasks that involve working with sources of ignition or fuel (e.g. cooking or welding) create greater risk.

(5) **Size and Complexity of the Layout of the Building.** Large rooms and complex layouts take longer to evacuate, so they need to be covered by more people. Smoke and fire may spread easier in simple layouts, but complex layouts can lead to people being trapped.

2. As a rule of thumb, fire fighter must be able to search their designated area **within 2-3 minutes**. All people should have evacuated and be in a safety staircase or route **within 1 minute**.

3. While selecting the members of firefighting teams; apart from their qualification and experience, it may be ensured that some in-living staff are included in the teams to effectively fight fire after closing of the university

4. As most of the Bahria University campuses are close proximity of naval establishments, therefore, the firefighting is organized for initial attacks and containment. Therefore, it is not necessary to have dedicated firefighting teams for the entire campuses. The staff from various departments on different floors are to be trained and used for firefighting.

**Annex D to  
Safety Policy**

**Comprehensive HEC Policy/Guidelines for Universities and DAIs on COVID-19**

**What is corona virus (SARS-CoV-2)?**

Coronaviruses are a group of viruses that cause diseases in mammals and birds, and respiratory tract infections in humans. Typically, these infections are mild, but rarer forms such as Middle East respiratory syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS) can be lethal.

The current coronavirus outbreak, recently declared a pandemic by the World Health Organization (WHO), is caused by the SARS-CoV-2 virus. This virus has been shown to have a close genetic similarity to bat coronaviruses, which are thought to have been its likely origin.

COVID-19 seems to be spread in a similar way to cold and flu bugs, through droplets created when a person coughs or sneezes being left on surfaces, which are then touched by other people and spread the disease further. At present, whilst COVID-19 appears to be more contagious than SARS or MERS, the fatality rate is relatively low (around 3%) when compared with MERS (34%) and SARS (10%), with early data suggesting the elderly and those with underlying health conditions are at a higher risk.

The health, welfare and safety of students and staff is the number one priority for the University. The University is taking a number of steps to safeguard our community.

**How does it spread?**

Although we have a lot to learn about this virus, it is currently believed that it spreads like other respiratory viruses- by people with the infection coughing and sneezing. These droplets are inhaled by other people or moved to the eyes, nose or mouth by contaminated hands.

## What are the symptoms of this infection?

Symptoms of COVID-19 may include the following:

- Fever
- Cough
- Shortness of breath or difficulty breathing

If you have these symptoms, stay home and contact your health-care provider for medical guidance. Please do not show up at a clinic, urgent care, emergency room or other health facility without contacting them first. Your provider will need to take special measures to protect other people in the clinic.

## Case Definitions

1. A patient with at least one of the following symptoms: Fever, Cough or Shortness of breath  
AND

A history of travel to or residence in a country/area or territory reporting local transmission of COVID-19 disease during the 14 days prior to symptom onset. A list of the countries can be found in the latest WHO situational report at <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

2. A patient with at least one of the following symptoms: Fever, Cough or Shortness of breath  
AND

Contact with a confirmed or probable COVID19 case in the last 14 days prior to the onset of symptoms;

3. A patient with at least one of the following symptoms: Fever, Cough or Shortness of breath  
AND

Requiring hospitalization with no other etiology that fully explains the clinical presentation.

### **Who is at high risk for complications from COVID-19?**

- People older than 60 years
- People with chronic medical conditions
- People with weakened immune systems
- Pregnant ladies

### **Dissemination of basic practices to the students /faculty and visitors to avoid transmission:**

- Panic should be avoided by informing 80% have mild symptoms and low mortality rate
- Proper COVID-19 awareness materials should be provided in all the offices/institutions.
- Visual alerts (signs, posters) at entrances and in strategic places providing instruction on hand hygiene, respiratory hygiene, and cough etiquette.
- Post information, like posters and flyers, that remind faculty/students and visitors to practice good respiratory and hand hygiene.
- In case of any concern of mild symptoms of employees, relief from work/work from home should be suggested to avoid any contact.
- Organizations should avoid face to face meetings in case of any such concern.
- All the offices should have work modalities policies in place, in advance.
- Avoid stigma in case someone turns positive for SARS-CoV-2 by creating awareness that it's just like any other respiratory virus.
- Help desks to be provided in each institute
- Information and videos regarding COVID-19 prevention, hand hygiene etc to be uploaded on university websites
- Helpline numbers to be provided on website
- FAQs should be displayed on university website
- Daily situation report on COVID-19 and NIH Pakistan dash board report to be shared on university website to provide latest information to staff /faculty and students

### **Preventive measures to be taken:**

#### **Everyday measures everyone can take (Standard precautions):**

- Wash your hands regularly with soap and water for at least 20 seconds

- Wipe your hands with disposable paper towels or clean towels.
- Soap and water should always be used if hands are visibly dirty.
- Use an alcohol-based hand sanitizer that contains at least 60% alcohol immediately after coughing, sneezing, or blowing your nose, if hand washing facilities are not available

- Cover your mouth and nose with your elbow (sleeve sneezing) or use a tissue when you cough or sneeze, and immediately dispose of the tissue in a covered bin
- If you feel unwell, stay at home
- Avoid close contact with people who are unwell
- Clean and disinfect frequently touched objects and surfaces

- Avoid touching your eyes, nose or mouth with unwashed hands
- Ensure thorough cooking of meat and eggs at university kitchens

**Students, staff and visitors should wash their hands:**

- before leaving home
- on arrival at University buildings or sites
- after using the toilet
- after breaks and sporting activities
- before food preparation
- before eating any food, including snacks
- before leaving the University

**If you feel sick:**

- Stay at home
- Rest as much as possible
- Drink lots of fluids
- Take your temperature daily
- Stay home for at least 72 hours after your fever ends, without the use of fever-reducing medications
- If you must need to go out of the house, wear a surgical mask and avoid close contact
- Avoid contact with the people who have compromised immune systems, underlying health conditions and/or are age 60 and older

**If you develop symptoms of COVID-19:**

If you develop any symptoms such as a fever, cough or shortness of breath, follow the steps below:

- Stay at home
- Avoid contact with others
- Contact your health care provider in advance
- Do not show up at a clinic or other health facility without contacting it first because your provider will need to take special measures to protect other people in the clinic / hospital.

**Tests for COVID-19:**

- Testing is typically conducted by taking a nasopharyngeal and throat swab at a healthcare facility.
- Call ahead before visiting your healthcare provider.

**Who should wear a mask?**

- Public health agencies currently do not recommend healthy people to wear masks when they are in public.
- It's most important for people who are sick to wear a mask in a healthcare setting (such as

a waiting room) to avoid exposing other people when they cough or sneeze.

- Masks should not be touched or handled during use.
- If the mask gets wet or dirty from secretions, it must be replaced immediately with a new clean, dry mask.
- Remove the mask using the appropriate technique – that is, do not touch the front, but instead untie it.
- Discard the mask immediately after use and perform hand hygiene.

### **How to wear a mask?**

- The dark surface is the outside of masks; the metal strip (nose clip) side is the upside of masks
- The light surface is the inside of masks, which closes to our face. In addition, pay attention to the part with the metal strip above the mask, and don't wear it upside down.
- Distinguishing the inside, outside, up and down of masks, and washing your hands before wearing masks. Then hang the rope on the ears at both ends.
- When wearing disposable medical masks, fully folded surface, and cover mouth, nose, and lower jaw entirely, then compress nose clip, so masks and face are in full contact with each other

## How to clean and disinfect surfaces?

- The U.S. Centers for Disease Control and Prevention (CDC) recommends cleaning and disinfecting frequently touched surfaces (e.g., door knobs, floors, handrails, tables, lifts, computer and keyboards etc)
- Departments should use a disinfectant on the U.S. Environmental Protection Agency's list of Antimicrobial Products for Use Against Novel Coronavirus, an alcohol solution with at least 70% alcohol, or a 10% bleach/water solution to disinfect hard, non-porous surfaces.
- Regular household soap or detergent should be used first for cleaning, and then, after rinsing, regular household disinfectant containing 0.5% sodium hypochlorite (i.e., equivalent to 5000 ppm or 1 part bleach to 9 parts water) should be applied at least once per day.
- Metal surfaces can be cleaned and disinfected with 75% Alcohol.
- It is also recommended that all departments purchase single use disinfectant wipes for touch points within their work spaces.
- Please avoid putting disinfectant gels or liquids on electronics and other equipment, including unless they have been indicated as safe to use on those devices.

- Clean and disinfect bathroom and toilet surfaces at least once daily. Regular household soap or detergent should be used first for cleaning, and then, after rinsing, regular household disinfectant containing 0.5% sodium hypochlorite should be applied.
- Clean the clothes, bed linen, and bath and hand towels using regular laundry soap and water or machine wash at 60–90 °C with common household detergent, and dry thoroughly.
- Gloves and protective clothing (e.g., plastic aprons) should be used when cleaning surfaces or handling clothing or linen.

**Work area protection:****On the way to work:****Wear disposable medical masks properly. Try not to use public transportation.**

- Walking, cycling, taking a private car or shuttle to work is recommended.
- If you must use public transportation, should wear the face mask all the way.
- Try to avoid touching anything with your hands on the way.

**Thermal screening:**

- Before entering the office building, should consciously take a temperature test.
- If the body temperature is normal, you can enter the building then wash your hands in the bathroom.
- If the body temperature exceeds 37.2 °C, please do not go into the building to work, go home for observation, if necessary, and please go to the hospital for treatment.

**Office work:**

- Keep the office area clean. It is recommended to ventilate 3 times a day for 20-30 minutes each time, and keep warm when ventilating.
- Keep a distance of more than 1 meter from person to person
- Wear a mask when work in a multi-person office.
- Wash your hands frequently, drink plenty of water, and insist on washing your hands strictly according to the seven-step method before eating and after going to the toilet. Both sides of the reception of outsiders should wear masks.

**Attend a meeting:**

- It is recommended to wear a mask and wash your hands before entering the meeting room.
- The meeting staff should be more than 1 meter apart.
- Try to reduce centralized meetings and control meeting time. When the meeting time is too long, open the window and ventilate once. The venue and furniture must be disinfected after the meeting.
- Better use video conferencing rather than physical presence in meetings or seminars

**In the dining hall:**

- Adopt divided meals to avoid crowded people.
- The dining room must be disinfected once a day, the tables and chairs should be disinfected after use.
- Cutlery must be sterilized at high temperature.
- The operation room should be kept clean and dry.
- Mixed use raw food and cooked food is strictly prohibited, also need to avoid raw meat.
- It is recommended to have a nutritious meal with light taste.

**On the way home from work:**

- Wear a disposable medical mask to go out after washing your hands. When you back home, remove your mask and wash hands firstly. Wipe the phone and keys with a sterile wipe or

75% alcohol. Keep the room ventilated and clean to avoid crowds.

**In public area:**

- Daily disinfection of public areas such as halls, corridors, conference rooms, elevators, stairs, toilets, etc. should be proceed, using spray disinfection as much as possible.
- Cleaning utensils used in each area should be kept separately to avoid mixing

**On travel:**

- It is recommended to wipe the interior and the door handle of the car with 75% alcohol once a day.
- Must wear masks when take shuttle bus. And the shuttle bus should be wiped and disinfected with 75% alcohol after use.

**Support staff:**

- Service personnel, security personnel, cleaning personnel must wear masks while working, and keep a safe distance from people.
- Canteen purchasers or suppliers must wear masks and disposable rubber gloves to avoid direct hand contact with fresh meat and poultry materials, wash hands and disinfect them immediately after removing gloves.
- Cleaning staff must wear disposable rubber gloves when working, wash and disinfect hands after working.
- Security personnel must wear masks to work, carefully inquire and register the status of outsiders, report abnormal situation in time.

**How to deal with abandoned masks:**

- During epidemic prevention, hand hygiene should be done before and after removing masks. Abandoned masks should be placed in trash cans, and the trash can should be disinfected with 75% alcohol or chlorine-containing disinfectant twice a day.

**Logistics:**

- Ensure supplies are available (tissues, waste receptacles, alcohol-based hand sanitizers, disinfectants, alcohol wipes etc)
- Facemasks should be available for those who develop respiratory symptoms
- Ideally the distance between two beds should be >6 feet if students or staff are sharing same room in hostel areas
- Similarly the sitting places should be > 6 feet apart in waiting areas.
- Hand sanitizers and hand washing facilities to be provided in hallways, corridors, waiting areas, library, cafeterias, outside lecture halls and offices
- Dedicated transportation facility should be made available in case someone becomes symptomatic and needs to be transported to healthcare facility

## Pathway for Faculty/Students concerned that they have COVID 19

### Fulfilling Case definition

#### Case definition

1. A patient with at least one of the following symptoms: Fever, cough or shortness of breath AND A history of travel to or residence in a country /area or territory reporting local transmission of COVID 19 depending on the WHO situation report during the last 14 days prior to the symptom onset.
2. A patient with at least one of the following symptoms: Fever, cough or shortness of breath AND Contact with a confirmed or probable COVID 19 case in the last 14 days prior to the onset of symptoms
3. A patient with at least one of the following symptoms: Fever, cough or shortness of breath AND Requiring hospitalization with no other etiology that fully explains the clinical presentation.

YES

#### SELF-QUARANTINE

Stay at a well ventilated single room with a separate toilet and avoid unnecessary contact with other people; practice frequent handwashing; wear a mask in times of close proximity with others

NO

Stay at home; Take precautions as for any upper respiratory infection with plenty of fluids, frequent hand washing, covering mouth when sneezing; healthy diet and rest.

Call helpline 1166

If necessary, you will be directed to nearest corona care unit

Wear a surgical mask; avoid public transport; avoid places with close contact with public; should be accompanied by not more than one attendant

Report at Nearest Corona Registration Counter

Nasopharyngeal and oropharyngeal swab will be taken by doctor and management in accordance with guidelines

**Dengue Prevention**

**IMPORTANT**

**Avoid Dengue by Preventing Mosquito Bites**

**Use insect repellent, wear long-sleeved shirts and long pants, and control mosquitoes inside and outside your home.**

**Visit your healthcare provider right away if you develop a fever, headache, rash, muscle or joint pain.**

**Signs and Symptoms of Dengue.** Most people infected have mild or no symptoms. About 1 in 4 people infected with dengue will get sick. Mild symptoms of dengue may be confused with other illnesses that cause fever and flu-like illness. Most people will recover after about one week.

**Severe dengue is an emergency. Recognize the warning signs.**

1. **Warning signs:** Watch for signs and symptoms of severe dengue to develop 24-48 hours after fever goes away.
2. **If you or a family member develops any of these warning signs, go to a local clinic or emergency room immediately:**
  - a. Stomach or belly pain, tenderness
  - b. Vomiting (at least 3 times in 24 hours)
  - c. Vomiting blood, or blood in the stool
  - d. Bleeding from the nose or gums
  - e. Feeling tired, restless, or irritable
  - f. Headache
  - g. Eye pain (typically behind the eyes)
  - h. Muscle, joint, or bone pain
  - j. Rash

**If you think you may have dengue**

- a. See your healthcare provider.
- b. Your healthcare provider may order tests to look for dengue or similar viruses, like chikungunya or Zika.

### **If you are sick with dengue**

- a. **Take acetaminophen or paracetamol** to control fever and relieve pain.
- b. Do not take aspirin or ibuprofen.
- c. Get plenty of rest and drink fluids to prevent dehydration.
- d. Rest in a screened or air-conditioned room or under a bed net while you have a fever.

### **Prevent Dengue.** You should know the following:

- a. No vaccine is available in the United States.
- b. No medicine is available to treat dengue.
- c. Avoid infection by preventing mosquito bites. Mosquitoes that spread dengue virus bite during the day and night.
- d. Use Insect Repellent.

### **Tips for Dengue Prevention**

- a. Dress your child in clothing that covers arms and legs.
- b. Cover strollers and baby carriers with mosquito netting.
- c. When using insect repellent on your child:
  - i. Always follow label instructions.
  - ii. Do not use products containing oil of lemon eucalyptus (OLE) or para-methane-diol (PMD) on children under 3 years old.
  - iii. Do not apply insect repellent to a child's hands, eyes, mouth, cuts, or irritated skin.
  - iv. Adults: Spray insect repellent onto your hands and then apply to a child's face.
- d. Dress your child in clothing that covers arms and legs.
- e. Cover crib, stroller, and baby carrier with mosquito netting.
- f. Wear long-sleeved shirts and long pants
- g. Use screens on windows and doors. Repair holes in screens to keep mosquitoes outside.
- h. Use air conditioning when available.
- j. Sleep under a mosquito bed net if air conditioned or screened rooms are not available or if sleeping outdoors.
- k. Once a week, empty and scrub, turn over, cover, or throw out items that hold water, such as tires, buckets, planters, toys, pools, birdbaths, flowerpots, or trash containers. Check inside and outside your home. Mosquitoes lay eggs near water.

**Hostel Hygiene Checklist**

<b>S No</b>	<b>Items</b>	<b>Instructions</b>
1.	<b>Caretaker / Manager</b>	There must be a Caretaker / Manager to see that the hostel is run and maintained properly.
2.	<b>Light, Ventilation and Fly Proofing</b>	Rooms used for living, dining, cooking or sleeping and toilet and bath buildings must have proper lighting and ventilation with fly proofing on windows and outside doors.
3.	<b>Beds and Sleeping Areas</b>	Suitable and separate beds must be provided for all hostellers. There should be proper air circulation and no undesirable odours in sleeping quarters.
4.	<b>Toilets, Lavatories and Showers</b>	An adequate number of toilets must be provided for hostellers. At least one shower and one lavatory with cold and or hot running water and one toilet must be provided for each 10 hostellers. There should be proper air circulation and no undesirable odours in bath, showers etc
5	<b>Drinking Water</b>	Safe drinking water must be supplied at convenient locations. Regular water tests must be conducted. Tests results are to be recorded and analyse.
6	<b>Kitchen Facilities</b>	Kitchen sinks must be supplied with hot running water. Shelves are required for equipment /food storage above the floor. Sufficient cold storage facilities (fridges, freezers) for the separate storage of raw and cooked products must be provided. The layout and design of tables, equipment should allow access for effective cleaning and/or disinfection. In addition, the wall areas directly behind cookers should have a durable surface finish, such as stainless steel, to allow vigorous cleaning. Design & construction of food preparation rooms must avoid the build-up of excessive temperatures & must be capable of keeping food at suitable temperatures. First In First Out (FIFO) must be practice in fridges and freezers.
7.	<b>Food Handlers</b>	All food handlers must be tested for communicable diseases on regular basis. Food handlers shall wear hair restraints such as hats, hair coverings or nets, beard restraints. Keep as clean as reasonably practicable all parts of his personal clothing or overalls and refrain from spitting and smoking. After using the toilet, should wash his hands with soap before resumption of his duties to prevent food borne disease transmission. Food handlers must prepare food above ground at all times.

8.	<b>Dining Areas</b>	The Buildings or Structure must have proper lighting and ventilation with proper fly proofing on windows and outside doors. The building or structure must protect hostellers from the elements rain, dust dampness and should to be smoke free. Floors, walls, ceilings, and woodwork / tables must be made of hard, smooth, impervious washable finish material that facilitate easy cleaning and or disinfection. Water must be supplied at convenient locations for hand washing and washing up utensils. The emergency exits should clearly be marked and instructions given in chapter 4 be complied.
9.	<b>Sanitation/ Garbage Bins/ Solid Waste Disposal</b>	All toilet and bathrooms, kitchen and mess halls, sleeping and living rooms, and beds and bedding must be kept clean and sanitised. Closed garbage and waste containers must be provided and must be emptied as often as necessary. The entire hostel area must be kept clean and well drained and free from trash and garbage to prevent attracting insects. These should in compliance with solid waste management system of the campus.
10.	<b>Laundry Facilities/Areas</b>	Laundry areas must have proper lighting & ventilation, with proper emergency exits. All washing machines where provided should <b>not</b> be located in food rooms so as to minimize the risk of food contamination. This is particularly relevant where soiled materials may have to be washed. There must be separate areas, shelves or containers for dirty & clean linen. The wastewater generated from laundry activities should not cause dampness or stagnant water that may encourage insects breeding.
11.	<b>Drainage/ Sewage / Waste Water Disposal</b>	The premises shall be free from depressions in which water can stand. Natural sinkholes, pools, swamps or other surface collectors of water within 200 feet of the periphery of hostel.
12.	<b>Safety, Fire Extinguishers</b>	All electrical outlets, panels must be properly protected. There must be adequate safety plans, adequate fire extinguishers; fire signs & first aid kits throughout the hostel. Instructions given at chapter 5 and safety check-list are to be followed.
13.	<b>Communicable Diseases/ Nurse / Medical History</b>	Regular medical checks and reporting/ recording of all signs and symptoms of communicable illness to the health authority is essential. Close contact and crowded environmental conditions are ideals for the spread of communicable diseases as well as parasitic infections, intestinal diseases and respiratory infections (bedbugs, scabies, round worms, tapeworms, Tuberculosis influenza). Instructions given at chapter 7 are to be followed.

**PERSONAL HYGIENE - GUIDELINE**

Good personal hygiene involves keeping all parts of the external body clean and healthy. It is important for maintaining both physical and mental health. In people with poor personal hygiene, the body provides an ideal environment for germs to grow, leaving it vulnerable to infection.

**Types of personal hygiene.** Each person's idea of personal hygiene differs. These main categories are a useful place to start for building good hygiene habits:

- a. **Toilet hygiene.** Wash your hands after you use the restroom. Scrub with soap for 20 to 30 seconds, and be sure to clean between your fingers, on the back of your hands, and under your nails. Rinse with warm water, and dry with a clean towel.
- b. **Shower hygiene.** Personal preference may dictate how often you wish to shower, but most people will benefit from a rinse at least every other day. Showering with soap helps rinse away dead skin cells, bacteria, and oils. You should also wash your hair at least twice a week. Shampooing your hair and scalp helps remove skin buildup and protects against oily residues that can irritate your skin.
- c. **Nail hygiene.** Trim your nails regularly to keep them short and clean. Brush under them with a nail brush or washcloth to rinse away buildup, dirt, and germs. Tidying your nails helps you prevent spreading germs into your mouth and other body openings. You should also avoid biting your nails.
- d. **Teeth hygiene.** Good dental hygiene is about more than just pearly white teeth. Caring for your teeth and gums is a smart way to prevent gum diseases and cavities. Brush at least twice a day for 2 minutes. Aim to brush after you wake up and before bed. If you can, brush after every meal, too. Floss between your teeth daily, and ask your dentist about using an antibacterial mouthwash.
- e. **Sickness hygiene.** If you're not feeling well, you should take steps to keep from spreading germs to others. This includes covering your mouth and nose when sneezing, wiping down shared surfaces with an antibacterial wipe, and not sharing any utensils or electronics. Also, immediately throw away any soiled tissues.

f. **Hands hygiene.** Germs on your hands can easily enter your body through your mouth, nose, eyes, or ears. Wash your hands:

- (1) when you handle food
- (2) before you eat
- (3) if you handle garbage
- (4) when you sneeze
- (5) any time you touch an animal
- (6) Likewise, wash your hands after changing a baby's diaper, helping someone clean themselves, or when cleaning a cut or wound.
- (7) Hands washing should be minimum 20 seconds

**1. SMO - Duties & Responsibilities:**

- a. SMO will examine the patient without delay and endorse the notes with date, time, signature and stamp during specified working hours.
- b. To attend any medical emergency case promptly in Sickbay/place of emergency in the university/CUs. In case of serious emergency evacuate the patient to the nearest hospital immediately with the help of administration.
- c. To carry out sanitary round on monthly basis of campus, cafeterias, pantries and general areas of the university/CUs to ensure high standard of hygiene in the premises. A written report to Director/Principal of the concerned CU will be forwarded.
- d. To carry out monthly medical examination of food handlers of headquarters, cafeterias, pantries and maintenance of their medical record.
- e. To refer any sick patient to hospital/lab/clinic for treatment, investigations as covered under health insurance of students/faculty/employees.
- f. To scrutinize and countersign the bills for claiming re-imbursment covered under health insurance ensuring proper counter checks.
- g. SMO is responsible for liaison with Services Hospitals for provision of medical cover and food testing during VVIP visits.
- h. Prepare proper and feasible working and operational plan and provide / monitor all kind of first aid and ensure the quality of management.
- j. SMO will formulate crisis management medical plan with the coordination of Director Campus in case of any eventuality.
- k. Medical examination of newly inducted faculty members and staff along with annual medical checkup of staff group 1-7.
- l. Will deliver health awareness and first aid lectures on dealing with emergencies, basic life support, mental health, tobacco smoking / drug abuse, communicable diseases, personal hygiene, prevention of seasonal diseases and importance of personal hygiene / physical activity / nutrition and current medical issues.
- m. Any other duty assigned by the Competent Authority.

2. **In-charge Sickbay - Duties and Responsibilities:**

- a. Will be overall in-charge of Sickbay.
- b. Will be responsible to SMO for cleanliness efficiency and proper discipline of the sickbay.
- c. Will be responsible for repair and maintenance of sickbay.
